82-1628

(C)

Wed Oct 3<sup>rd</sup> 1849 Hospital Cases. Medical.

Case 1<sup>st</sup>

A man who had contracted a fever on the coast of Africa in which all the crew with the exception of himself and Captain ~~were~~ died.

Main points.

On Percussion the Spleen was found enlarged the dull and flat sound extending up as far the 4<sup>th</sup> rib and as low as the 8<sup>th</sup> dorsal vertebra.

Treatment.

Case 2<sup>nd</sup>

Dysentery.

Face pale, and constitution anemic. Percussion

low. Main points.

Face pale, and anemic.

Case 3<sup>rd</sup>

Chronic Pleurisy.

Main Points.

Right side enormously distended both behind and before. Percussion dull from the beginning to the end of the lung, i.e. from the apex to the lower part. Anemic;

Treatment.

Blister. This to be changed as to its location before or behind.

Remarks. This patient was very anemic, and this condition was a contraindication against bleeding. The distension was caused

by a serous effusion.

Feb. 26 185

Some pathological specimens were exhibited which were taken Rectum, lower portion of the colon and smaller curvature of the stomach and a portion of the small intestines.

Rectum and Lower portion of the Colon.

numerous patches of cicatrised ulcers.

Small Intestines.

Glands of Peyer ulcerated and enlarged.

Duodenum.

cicatrised patches of old ulcers

~~Glands~~

Stomach.

A portion of the ~~mucous~~ coat almost transparent; owing to ulceration.

These specimens were from a patient.

(Wed Oct 3<sup>rd</sup> 1849)

Case 1<sup>st</sup>

Granular lids.

Surgical.

Main points.

Anemic in constitution.

Treatment.

Dropt about 5 drops of a 10gr solution of Nitrate of silver into the eye.

Remarks.

The lids were very much inflamed and the vascular capillaries very much enlarged and distended. The eye was very sensitive to the light.

Case 2<sup>nd</sup>

Granular lids.

Main points.

There was nothing very striking in this case. Except with regard to the cause. It was at first thought by the Surgeon to be a case of Gonorrhoeal Ophthalmia. But afterwards it was ascertained that the patient being afflicted with sore eyes washed them in not only his own but others urine, and produced granular lids.

Treatment.

Rubbed with a crystal of Sulphate of copper. 30gr solution of Nitrate of silver.

Lat Oct 6<sup>th</sup>  
Case 1<sup>st</sup>

## Hospital Cases.

Medical.

Typhoid fever, in a mild form, very little Tympanitis.  
Little prostration.

### Main Points.

a very mild case. Tympanitis very slight.  
very little prostration. Mind rational. Countenance florid. Tongue red.

### Treatment.

Case 2<sup>nd</sup>. Lpts. Ammonia. Lpts. gallici vini. Lpts. Medici

Thought to be incipient Typhoid Fever

### Main Points.

Pneumonic rale. Percussion at the back  
part of the chest flat. The symptoms were altogether Pneumonic.

### Treatment.

Plaster on the back part of the chest.  
below the scapula.

~~Case 3<sup>rd</sup>~~

### Pathology.

1<sup>st</sup> Aortic Atherosclerosis, of the Aorta Descendens  
in connection with a valvular disease of the heart.

Lungs

The congested the other almost normal.

## Surgical.

Case 1<sup>st</sup>

Gonorrheal swelling of the Knee point of the ~~left~~ <sup>right</sup> side

### Main Points.

At this case Dr. Fox made some remarks upon the treatment of gonorrhea. The urethra should be syringed out first with cold water once or twice before injecting it with Liquor Argenti Nitrici. of this solution one or two injections of the 10 grain solution is sufficient. afterwards it is to be washed out with cold water and the cold water injections to be frequently repeated.

### Treatment.

Case 2<sup>nd</sup>

The following were the old cases <sup>of granular pharynx</sup> of last time doing well under the treatment.

Wed Oct 10<sup>th</sup>  
Case 1<sup>st</sup>

## Hospital Cases.

Medical.

### Pneumonia.

#### Main Points.

The disease was in the upper portion of the lungs, both were affected but the right more than the left as was shown by the greater resonance on that side. The fore part of the chest below the clavicles was the part percussed. ~~Diagnosis~~

#### Treatment.

Blisters and ~~to~~ again calomel every

Case 2<sup>nd</sup>

### Tubercle; Pneumonia. with Chills.

#### Main Points.

Harling sound; Induration of the upper portion of the left lung.

#### Treatment

Case 3<sup>rd</sup>

I do not recollect what Dr Gerhard said of this case but there was an immense bulging of the back part of the left side. The patient was shown to the class last clinic, then his face was pale, it had <sup>now</sup> become saddy.

Remarks. Diseases of the Heart may be divided into those whose tendency is to grow worse and those where there is no such tendency. In the former treatment is absolutely necessary in the latter not so much so.

## Surgical

Case 1<sup>st</sup>

Gun shot wound.

Main points.

The wound was caused by a musket ball.  
Entered just below the right clavicle. It had no exit.

Treatment.

Cold applications.

Case 2<sup>nd</sup>

Gun Shot Wound

Main Points.

In this case the ball entered the  
back part of the chest ~~just over~~ This was a little boy  
about 10 years of age.

Treatment.

Cold applications.

Case 3<sup>rd</sup>

Gun Shot Wound in calf of the leg. Dr Fox  
introduced his finger into the wound but could not  
detect any thing. The aperture of exit was nearly opposite  
to that of entrance. ~~There~~

Remarks.

There was no hemorrhage in either of these  
wounds. Dr Fox remarked that seldom was there  
any hemorrhage from these kind of wounds until after  
the slough which forms had come away. This case was treated  
in the same manner except that the wound was filled with a wad of lint

Lat Oct 13<sup>th</sup> Hospital Cases. Medical.

Case 1<sup>st</sup>

Typhoid Fever.

Main Points.

16<sup>th</sup> day. Countenance had a yellowish red appearance. Subcutis. Tympanitis. Tongue dry and hard. Enlarged Spleen.

Remarks.

Typhoid occurs in Paris at all seasons, but in this country it is more frequent in the Sept and Oct. It is not contagious. ~~It seldom~~ The Brain and Lungs are very apt to be affected in this disease, as well as the intestines which is the seat of the disease. There is always diarrhoea or a tendency that way. There is generally delirium at night more ~~or less~~ never amounting to much however. This symptom distinguishes it from Typhus. The bladder should be examined every day. Pulse soft and compressible.

Treatment.

Tonics and Stimulants.

Brandy 3viii a day  
Aromatic Spts. of Ammonia in preference to  
the carbonate. Wine whey. Beef tea as nourishment  
Blisters.

Venesection and Cupping. At the former part of the disease only, ought general bleeding to be adopted.

Prognosis.

The flushed reddish yellow face was the best prognostic symptom in this case.

Hospital Cases.

Surgical.

~~One~~ the cases which The brain and skull of a recent autopsy were shown. The death was caused by a bullet entering the left Parietal bone, and after taking a diagonal and downward course completely dividing both sides of the brain, lodged itself in the lower portion of the cranium.

Case 1<sup>st</sup> Case 3<sup>rd</sup> of the last Clinic

An Patient a man of 22 yrs old.

Necrosis has set in at the aperture of the entrance of the ball. Dr Fox thinks he will have to lose his limb; thinks this result owing to some important vessels and parts being divided. The ball had fractured the Tibia and passed between that bone and the Fibula, and came out about an inch below where it entered.

The patient looked very pale.

The patient who during the summer was brought in with a fracture and depression just above the supra-orbital ridge ~~was~~ having been kicked by a mule. was shown and was doing very well.

Wed Oct 17<sup>th</sup>

## Hospital Cases. Medical.

### Case 1<sup>st</sup> Typhoid Fever.

A Man 45 yrs of age, was previous to his entrance in the Hospital seized with chills which was succeeded by an attack of Typhoid fever.

#### Main Points.

Tongue moist and whitish.

A slight dose of oil caused a diarrhoea. Sudamina were observed upon the abdomen in great quantities.

#### Remarks

In treating this disease, sometimes, Spts. Vin. Gall. is too powerful a stimulus, and since whey is substituted. Caution is to be observed with regard to Opium ~~enemas~~ injections before in this disease. They are indicated in cases accompanied by severe diarrhoea.

#### Treatment.

Spts. Mindereri.

Fort-bark.

Wine whey.

Neutral Mixture.

In this case a conditional bleeding was tried, the pulse being large and full.

### Case 2<sup>nd</sup>

#### Pathology.

#### Dysentery.

Case 1<sup>st</sup>. Rectum, sigmoid flexure of the Colon and part of the lower portion of the Ileum.

Rectum.

Large ulcers one of which pierced under the mucous coat.

Colon.

Particles of Lymph scattered here and there. Less ulceration in the Sigmoid Flexure than in the Rectum. There was more however above in the ascending colon. The mucous coat was of a bright red tint. This intestine on the whole was the most diseased.

The part of the Intestine occupied by the glands of Peyer was formed into ridges of lymph, these glands were not at all affected showing a difference in the Pathology of this disease and Typhoid Fever.

Case 2<sup>d</sup>

Rectum.

Lightly diseased

Colon

Near the commencement of the Transverse colon was a large patch of Inflammation.

Caecum (lower portion)

Very red and inflamed, the colour was almost as deep red as of a lake colour. In this intestine and the above patch were the most prominent marks of the disease.

Remarks

From the above facts Dysentery may be combined with Enteritis and Colitis either singly or combined.

Treatment of Dysentery in Penna Hospital.

Begin with Laxatives. Castor oil or Rhubarb with  
about 20 grains of Laudanum.

Ipecacuanha.

To determine the  
surface.

Mercurials.

Poultices and Topical bleeding.

Amputation ought seldom to be resorted to.

Acetate of Lead is not much thought of in the Penna Hospital  
in the treatment of this disease.

## Surgical.

Case 1<sup>st</sup> -

Amputation of the Leg at the upper third of the Tibia.

The disease was seated at the lower end of the tibia the result of a compound fracture. The foot was turned almost at a right angle with the body.

Main Points.

Flap operation. Cold applications to the stump.

Lat Oct 20<sup>th</sup>

Perm<sup>a</sup> Hospital

Medical.

Case 1<sup>st</sup>

Typhoid Fever.

Main Points.

Very mild, the only symptoms being the sudamina and the tongue dry and coated, and the characteristic hue of the face.

Case 2<sup>nd</sup>

Remittent Fever.

Main Points.

Resembled Typhoid fever, very much.

Treatment.

Quinine.

Blue Pil grs X  
Rochelle salt ʒi

Pathology

Typhoid Fever.

Main Points.

Glands of Peyer ulcerated. Large red patches of inflammation in the mucous membrane of the colon.

Enlarged spleen, 10 inches long and 4 or 5 in breadth.  
Left.

## Surgical.

The man who received the ball in the calf of his leg was thought strong enough to bear an operation of amputation which was expected to day. He was not expected to live.

~~Case~~ The black man who had his leg amputated has suffered from hemorrhage. Dr Fox ordered the chair to be placed between the two flaps, and took up one or two small vessels. This treatment checked the hemorrhage. Dr Fox here remarked that this was the objection to flap amputations the hemorrhage which always occurs from the vessels being cut obliquely and therefore making a larger orifice and from the fact, that vessels cut in this manner do not contract their orifices when cut.

Case 1<sup>st</sup>

A man who had been operated on for cataract. In the exhibition of this case, the Doctor took the opportunity to speak of the diagnosis of Cataracts depending upon the Catoptrical experiment as a guide. This is as follows. If a candle is placed before an eye affected with cataract three images will be seen, one of which will be upside down the other two in their proper positions. Slightly affecting the mouth with calomel is sufficient safe guard against inflammation. Dr Fox remarked that in all cases of cataract he believed the Retina more or less to be affected, In regard to the condition of eye favourable to an operation, he remarked

that the reason of so many failures in the restoration of sight after this operation was the fact that they were not operated on in the right time. No patient, says he, should be operated upon if they cannot distinguish darkness from light, day from night

Oct. 24<sup>th</sup> 1877

Case 1<sup>st</sup>

Penn. Hospital. Medical.

~~Ac~~ Hypertrophy of the Heart with Dilatation.

Main Points.

The sound was flat from the nipple to the sternum and beyond. There was Epistaxis and Hemoptesis. Man 28 yrs old, rather small stature. Pulsations evident at the distance of six feet. Bellows sound which increased to the rasping sound when the patient walked or exerted himself.

Treatment.

This consist in care in lifting heavy weights, ~~the~~ absence of stimuli <sup>and</sup> ~~especially~~ Tobacco.

Digitalis grs.  $\frac{1}{2}$  3 times a day.

Bitart. Potassa.

Lumpen Berry (3 times a day)

The diseases of the Heart are divided into Organic and Functional.

Case 2<sup>nd</sup>

Congestion of the Heart.

Main Points

Lady 30 yrs of age. Had previously Rheumatism, which disappeared when the Heart became affected. Dropsical effusions. Epistaxis and Hemoptesis.

Oct 27<sup>th</sup>

Penn<sup>a</sup> Hospital.

Medical.

Case 1<sup>st</sup>

Dropsy.

Main Points.

Swelling of the skin. Edema of the lower limbs when pressed with the indented mark remained a long time after the finger was removed. Percussion clear to the level of the ribs.

Treatment.

Increase the strength with Quinine and Iron as well as the other remedies.

Case 2<sup>nd</sup>

The man who contracted a fever on the coast of Africa came before the clinic with Ascites. Came into the <sup>Hospital</sup> on the 1<sup>st</sup> Oct was shown to the clinic on the third.

Oct 31<sup>st</sup>

Hospital cases

Medical

Case 1<sup>st</sup>

The man with Dropsy and oedema of the lower limbs, almost well, under the Quinine and Iron.

Case 2<sup>nd</sup>

Acute Rheumatism.

Characteristic Symptoms

Pulse strong and vigorous. Great tendency to perspire. Forceful action of the heart, Bellows sound.

Remarks.

In these cases of Rheumatism the Heart is always affected says Dr. Gerhard; in this case there was endocarditis. The heart ought always to be examined when we are at a doubt in diagnosis. When the joints are inflamed there is effusion and fluctuation can be detected, Opium in substance or in tinct is sometimes applied to the joints inflamed. Cups also may be applied. Blood was not much cupped in this case. When the attack is sudden and it generally lasts about 10 weeks.

Treatment

Bleedings and Purgatives.

vin: Colchici ʒij  
Calc: Magnesia ʒi  
Sulf: Magnesia ʒss

Case 3<sup>rd</sup>

19

Typhoid Fever. 8<sup>th</sup> day.

Characteristic symptoms.

No Rudamina or Tympanitis, Spleen unaffected, Pulse frequent and small.

Treatment.

Neutral mixture.

Pathology.

Peritonitis.

Liver.

Right lobe hypertrophied left atrophied. Tubercles

Spleen.

Tubercles on the surface only but not in the interior

Colon

A Mass of adhesion. greyish colour

Small Intestines.

Glands of Peyer and Brunner ulcerated

Stomach.

An ulcer of large size at the lower portion.

Oct Nov

Penn Hospital. Medical.

Case 1<sup>st</sup>/<sub>II</sub>

Acute Rheumatism, with Endocarditis and Pericarditis.

Characteristics ~~Symptoms~~.

Face pale, small stature. Friction sound over the region of the heart, Dulness on Percussion.

Treatment.

Blister over the region and cups. Calomel in alterative doses.

Remarks.

Palpitation and other diseases of the heart, generally occur in this disease in about three or four weeks after it has set in. The friction sound along with dulness upon percussion indicate the existence of Pericarditis. The natural sound of the heart may be explained by sounding with the mouth the words "Lum-Yap" the first being long the last short. Whereas in a diseased heart these two words cannot be distinguished there is a confused intermingling of them thus Lum ta — a lengthening out of the last syllable.

Case 2<sup>nd</sup>/<sub>II</sub>

Tubercles in the upper lobe of the left lung.

Characteristics.

Boy about 15 yrs of age. Stout and apparently in good health. Cheerful expression of countenance.

Remarks.

Dr Wood remarked, when this case was before him the fact accounting for the deceptive tendency of this disease. When ~~the~~ tubercles are empty and purulent secretion going on there is great irritability but when the hollow in the tubercle becomes full, there is little or no irritation and consequently the patient seems to enjoy his ordinary health.

Treatment

Good Cod liver oil.

Case 3<sup>rd</sup>

Pleurodynia.

Treatment.

Dovers Powders

Calomel grs. ~~ss~~  $\frac{1}{2}$

Vin. Colchicum gttss XX.

Case 4<sup>th</sup>

Chronic Pleurisy.

Characteristics.

Large swelling in the lower portion of the Right side of the chest. Percussion exceedingly flat, resembling the sound of a board when struck.

Treatment.

Blisters, over the swelling.

Case 6<sup>th</sup> D.

Palsy and Paralysis originating in the Spine.

Characteristics.

Patient unable to walk with crutches, and even then with extreme difficulty.

Treatment.

Strychnia. gr<sup>ss</sup> 1<sup>lv</sup>. Aqua Font 3i  
Acetic Acid 3i

Surgical

Case 1<sup>st</sup>

Wound in the hand from a Pistol ball."

Characteristics.

The whole palm of the hand was more or less contused  
Poultice of flaxseed meal was applied to the hand.  
and the hand firmly bandaged to a splint.

Penn<sup>a</sup> Hospital. Medical.

Case 1<sup>st</sup>

Typhoid or Enteric Fever.

Characteristics.

Second stage of the disease. Tongue red, dry, and marked with small gashes. Stupor in a slight degree. Redness in the face. Pulse small and full and compressible. Slight tenderness few red spots over the abdomen. Had slight epistaxis.

Treatment.

Oleum Yerebuth:  $\text{gtts } x$  in a Gum Arabic emulsion every two hours and alternately a wine glass of Sago as thick as will well pour every 2 hours. Carb: Amm:  $\frac{1}{4}$  grs v. Lemon

Case 2<sup>nd</sup>

Dehydration.

Good Liver oil.

Case 3<sup>rd</sup>

Rheumatism.

Characteristics.

Swelling and fluctuation under the Bursa Mucosa of the first joints

Case 4<sup>th</sup>

Torpid effusion from Intermittent Fever.

Characteristics.

Albuminous urine.

Treatment: 1<sup>st</sup> To prevent the return of Intermittent

2<sup>nd</sup> To the torpid effusion. Bitart: Potap:  $\frac{3}{4}$  i

Lunipewbeny tea ptj  
To be well shaken, before taken

Fer: pil: grs v

Gulp: Quin: grs 2

4 times per day

Nov 17<sup>th</sup>

Penn<sup>a</sup> Hospital Medical

Case 1<sup>st</sup>

Typhoid case of last clinic

Characteristics

Tongue moist. More intelligent. Pulse stronger and more natural

Case 2<sup>nd</sup>

Dropsy case from Intermittent fever of last time

Characteristics

oedema much less.

Case 3<sup>rd</sup>

Eczema

Characteristics.

Small eruption on the back of the hand. Not time for the Var Rint  
Treatment.

Glycerine plaster. with an occipital dose of

Salts.

Case 4<sup>th</sup>

A Young woman, who complained of general pain over her body especially in the stomach and heart. The Spine was examined by Dr Wood who detected a sore spot about the middle of the Dorsal region to which he applied cups and a blister and the patient was relieved.

Case 1<sup>st</sup>

## Surgical

25

The man who was operated on for Hydrocele was brought in with his ~~the~~ scrotum swelled up again

(Wed) Penna Hospital. Medical.

Case 1<sup>st</sup>

### Typhoid case of last clinic

#### Characteristics.

Tongue moist. An apple, which he ate produced an increase of the symptoms. which led to the supposition of their being ulceration in the Peyer Glands.

#### Treatment

Cal: grj

Ipecac gr  $\frac{1}{8}$

Opium grj

Not to allow salivation.

Case 2<sup>nd</sup>

### Topsy case of last clinic

#### Characteristics

Swelling entirely gone, and the Patient well.

#### Treatment.

Still takes the Cream of Tartar Zi  
Limeberry tea ptj

Case 3<sup>rd</sup>

Diseased Mitral and Tricuspid valves of the left heart.

#### Characteristics.

The Lum-Tup not heard distinctly. Regurgitation heard over the Aorta. Effusion within the Pericardium. Dulness upon Percussion, over the arterial heart. Has had the disease since he was 8 yrs old now 42 yrs of age

Med) Surgical

Case 1<sup>st</sup>

Fungous growth around the anus caused by *Rus Radicans* or Common Poison vine.

Treatment.

Application of Nitric Acid.

Case 2<sup>nd</sup>

A large ulcer upon the leg.

Treatment.

Nitrate of Silver around the white border.

Penn<sup>a</sup> Hospital. Medical

Case 1<sup>st</sup>

A brain of one who had died of *Sclerimus Tremens* which was found inflamed, but not softened.

Case 2<sup>nd</sup>

The old case of effusion into the cavity of the chest result of Pleurisy.  
Characteristics.

Shoulder elevated on the affected side.  
Flatness upon percussion high up the chest.

Treatment.

Blister.

Squill  $\mathfrak{z}\mathfrak{i}\mathfrak{j}$   
bal  $\mathfrak{z}\mathfrak{i}\mathfrak{j}$

Three times a day.

Case 3<sup>rd</sup>

Pneumonia with effusion.

Characteristics.

Subcrepitant rale. Dulness on Percussion.

Treatment Calomel

Case 4<sup>th</sup>

### Edema of last clinic.

#### Characteristics.

Legs much smaller. evacuations from the bowels diminished from 16 or 17 per day to 7. Face thinner

#### Treatment.

pil: Carb: Ferri. Quinine. Digitalis. Liquill.

Case 5<sup>th</sup>

### Dropsy from Intermittent Fever.

Treatment. pil: Carb: Ferri. Cream of Tartar. Juniper berry  
Tea.

(Sat)

Penn<sup>a</sup> Hospital Medical

Case 1<sup>st</sup>

### Phthisis.

Treatment. Cod liver. 3℥ 3 times a day

Case 2<sup>nd</sup> Phthisis with Laryngitis.

Treatment Cod liver oil internally, Croton oil externally  
on the neck for the Laryngitis

Case 3<sup>rd</sup>

### Typhoid Fever.

#### Characteristics.

Symptoms all in their first and mildest form  
Tongue moist and cracked. Slight Meteorism.

#### Treatment.

Nerv. Mixture - 3℥ three times a day

Case 4<sup>th</sup>

### Typhoid Fever.

Characteristics. — Tongue beginning to clean in the middle. Rose colored spots  
L. damine  
Treatment. Nerv. Mixture. If there is debility in the evening, wine cher. and Yerp. if the tongue  
becomes dry

Case 5<sup>th</sup>

Species of Chorea.

Characteristics.

Shaking of the head. Contortion of the features.  
Muttering of disjointed words.

Treatment.

Wine glass of the Decoction of snake root four times a day.

Case 6<sup>th</sup>

Eczema Eruption on the face; of last clinic with Amenorrhoea.

much less

Treatment. Carb. Potass. Aloe and the local application of Glycerine  
Aloe. Tinct. of Cantharides for the Amenorrhoea and Tact. Em. in nauseat-  
ing doses.

Case 7<sup>th</sup>

Penia Lata

Characteristics.

Plethoric. uneasiness and pain <sup>in</sup> the bowels. Irregular appetite.  
obstinate case.

Treatment.

Scum Terbinth: 3j to a wine glass three times a day.

Penia Hospital Medical

Case 1<sup>st</sup>

Convalescence from Typhoid Fever.

Characteristics.

Abdomen tympanitic. Tongue dry, or disposed to be so

Treatment.

As. Snow root and milk.

oil of Turpentine gtt X

Case 2<sup>nd</sup>

Penia with effusion (the old case of last clinic)

## Characteristics.

Becoming prominent at the upper part of the chest.

Treatment.

Cal

Case 3<sup>rd</sup>

Inflammation of the Pylorus.

## Characteristics.

Loreses and Tenderness upon pressure over the pylorus complained of vomiting a hot watery fluid.

Treatment.

Nitrat's Arg:  $\frac{1}{8}$  three times per day.

Surgery.

A man who a week since was struck on the head by the butt of a gun, and had his skull fractured; and who was brought before the class at the last clinic, has since died and in the right lobe of the brain was found a large abscess from  $\frac{1}{2}$  inch in depth and from  $1\frac{1}{2}$  wide and  $2\frac{1}{2}$  inches long. Before death the right side became paralytic.

Lab.

Penn<sup>a</sup> Hospital

Case 1<sup>st</sup>

Lymphoid Fever.

## Characteristics

Tongue dry. Lardes. Abdomen tympanitic

Pulse frequent

Treatment.

Scut. Mixture. Sago gruel wine glass every two hours. also the Blue pill for the dried state of the tongue.

Case 2<sup>nd</sup>

Chronic Gastritis.  
Characteristics.

vomiting after meals, constriction  
and pain at the abdomen. Tenderness over the Pylorus.  
Treatment.

Nitrate of Silver  $\frac{1}{4}$  gr with  $\frac{1}{2}$  gr opium 3 times  
a day with Colombo Lemna and Ginger for the  
dyspepsia symptoms.

Case 3<sup>rd</sup>

Asthma.  
Characteristics.

Paroxysmal coughs.

Treat.

Tinct of Lobelia. Zi  
Tysup of Seneka. Zi  
Tysup of Squill. Zi

Case 4<sup>th</sup>

Paraplegia.  
Characteristics.

A very bad case, the <sup>patient</sup> unable even to use crutches.  
Treatment.

Strychnine  $\frac{1}{12}$  grain

Case 5<sup>th</sup>

Chorea of the muscles of the face with muttering  
of unconnected words.

Treatment

Cimicifuga an occasional purge  
and constant blisters to the spine

Feb 6<sup>th</sup> 1850

Penna Hospital. Medical

Case 1<sup>st</sup>

Impacted faeces in the ~~sig~~ commencement of the Colon.

Characteristics

Hard, and well defined swelling in the right iliac fossa.

Treatment.

Caster oil internally and a Flaxseed poultice externally, Intends using the Iodine oint

Case 2<sup>nd</sup>

Inflammation of the Liver and Duodenum.

Characteristics

Jaundice, very anemic inasmuch as not to allow abstraction of blood. Tongue Black

Treatment

Blue mass gr

Opium gr  $\frac{1}{12}$

every 2 hours.

Wine whey as nourishment

Case 3<sup>rd</sup>

Acute Rheumatism

Treatment

Dov. Powder: grs. V

Cal gr

every 4 hours.

"Nature, and Disease debate it at their leisure" <sup>Shakespeare</sup>  
Cases recorded in the Philadelphia Almshouse.  
Case 1<sup>st</sup> Typhoid Fever. Died. June 1<sup>st</sup> 1850

Wednesday June 29<sup>th</sup>

Respiration hurried. Pulse comparatively  
Tongue dry. Has had 12 cups ordered over the breast.

" " 20<sup>th</sup>

Respiration eased. Tongue dry in the middle  
but moist at the edges.

Case 2<sup>nd</sup> Diabetes.

Died

June 28<sup>th</sup>

Tongue clammy. Pulse small and  
weak. complains of a pain in the bones of his legs (one,  
the left there is a slight roughness indicating  
the existence of nodules?) Has passed about two gallons  
during the night.

Treatment

Reef diet <sup>113</sup> The rest of the treat-  
ment I have lost by inattention

July 5<sup>th</sup>

For the last two or three days has been  
lying his mind has been torpid, and inactive

" 5<sup>th</sup> Has been up 2 in the night. Pulse rather  
fuller. Has a blister over the epigastrium.

" 8<sup>th</sup> Still weak. Taking. Ints: sin: gal 3ii

" 9<sup>th</sup> ~~Still~~ Extremities cold. Tongue cold and white.

" 11<sup>th</sup> Extremities continue cold. Pulse very feeble

" 13<sup>th</sup> Has had diarrhea in the night.

" 15<sup>th</sup> Pulse weak and small. passes involuntarily sanious

Case 3<sup>rd</sup>.

33

Pneumonia succeeding Mania a Potu.

June 23<sup>th</sup>

The Mania a Potu was slight. The chief features of this case was the the Pneumonia that succeeded. Pulse small, and weak; Drs Benton, and Gard distinguished, crepitation on the right side in the upper portion of the lung. Tongue a creamy white. still complains of pain in his chest.

Great

Has had a blister on since yesterday.

Blood from his bowels ~~accompanied with~~ tenderness, and pain in the bowels to a great degree.

17<sup>th</sup>

Pulse feeble, and weak. Skin cold.

18<sup>th</sup>

Pulse, feeble.

Case of Gastritis (Chronic)

July 6<sup>th</sup>

A young, and interesting looking German, about  
of age, of a neuro sanguineous tempera-  
ment. Tongue very red at the tip and in the places  
where the thick sordes which covers it elsewhere  
has been removed.

July 8<sup>th</sup> Much better. Tongue cleaning off beautifully

" 9<sup>th</sup> Getting along well.

" 10<sup>th</sup> Tongue still red <sup>at tip</sup> and covered with a brown  
thick coat

13<sup>th</sup> Well

15<sup>th</sup> Almost well. Tongue still too red.

16<sup>th</sup>

Case 4<sup>th</sup>

Secondary Syphilis

John James Collier came in June spotted all over from head to foot with resembling varicoid so thick were the spots. They were thickest around the sacrum and elbows accompanied by pains in his bones. Taking the Hydriodate of Potassa and Bichloride of Mercury

July 5<sup>th</sup>

Continuing the Biniiodide of Mercury?

The spots fading rapidly. Taking the following

Biniiodide in the following way

Iodide Potassa ʒi  
Bichloride of Merc gr i  
Aqua ʒviii

Sig

ʒss Three times a day

July 8<sup>th</sup> About as usual. gradually getting better.

11<sup>th</sup> Continuing to improve.

15<sup>th</sup> Much better.

17<sup>th</sup> The spots fading rapidly.

20<sup>th</sup> Gradually regaining a normal appearance

31<sup>st</sup> Still in the wards. slowly getting rid of the eruption

Aug 5<sup>th</sup> Still under my care

Effects of Cod liver oil.

July 6<sup>th</sup>

Young Irishman, has had <sup>Incip. Phthisis</sup> ~~fractures~~ and  
has been rejected; determine to put him on Cod  
liver oil this morning and watch its effects.  
July 8<sup>th</sup> Has expectorated during the night blood and  
rusty coloured sputa.

July 9<sup>th</sup> Pulse large and strong. Still expectorating  
Pneumonic expectoration.

July 20<sup>th</sup>

Layshe is better. Treatment the same as on  
the preceding days. Being Cod liver oil  
and Expectorants.

Aug 6<sup>th</sup> Found him to day in bed

Aug 1<sup>st</sup> Has a disposition to be in bed all day  
although seemingly better.

Aug 12<sup>th</sup>

No blood in the Cup, little prof.

Sept 3<sup>rd</sup>

Has been complaining of an intense  
pain in the right hypochondriac region.

Case Jaundice from a distended gall bladder

June 29

William Lucy Aged

" 19<sup>th</sup>

A large swelling the size of an ordinary potato in the region of the Caput Coli (gall bladder)

" 20<sup>th</sup>

has taken a purgative and is much better the swelling less and not so hard.

July 5<sup>th</sup>

Walking about and beginning to regain his usual colour of skin.

" 8<sup>th</sup> Still <sup>has</sup> yellow skin.

" 9<sup>th</sup> Still in the wards, but not complaining.

" 11<sup>th</sup> Still in the wards, and improving.

" 13<sup>th</sup> Still in the ward, but the yellowness of skin has nearly entirely disappeared excepting that in the conjunctiva.

15<sup>th</sup> Still improving, regaining his natural colour. Still yellowness of the conjunctiva and underneath the tongue.

16<sup>th</sup> Improving.

19<sup>th</sup> Almost well. His natural colour not altogether returned. The lump in his side which indicated, at the commencement of this attack, an enlarged gall bladder, has disappeared, neither does he feel any pain upon pressure.

Indraghis  
Suicide. Cut throat. July 21<sup>st</sup> 1855 J. H. Elliott  
July 21<sup>st</sup> Saw a man lying upon the floor of the Marion Co. jail  
of Indianapolis, with his throat cut. Could make no  
satisfactory diagnosis, as he was not my patient and  
did not therefore take the liberty of making the necessary  
examination. But from a bird's eye diagnosis I conclude  
that neither Carotids were cut, as it was a right  
angled incision with the razor either above the  
Hyoid bone, or in the Thyro-hyoid space; I could  
say positively which, and such a cut would have to  
almost sever his head off before these vessels could be  
reached. I saw him two hours after the act. The symptoms  
when I saw him are the following. Fixed determined ex-  
pression of eye. Spasmodic gasping for breath. Colour of the  
face natural. Intellect perfectly altered, could not talk but  
wrote questions & answers without trouble upon a slate paper.  
Makes a shrill peculiar noise, with his efforts to speak or  
breathe. Pulse very feeble. I advised Dr Elliot to sew up  
around a Trachea tube, and if necessary and he  
could swallow stimulate, as he was faint weak from loss of  
blood. He would not permit them to do anything, until the next morning  
at 9 o'clock when Dr Kitchen ~~saw~~ put three stitches, leaving a  
space for the phlegm to run out. His Physician diagnosed that the  
Larynx was completely severed, and the Pharynx cut.  
I did not think so, however, my diagnosis was correct. External Jugular was not cut.  
July 22<sup>nd</sup> Has had afternoon fever, but slight. Pulse in the <sup>morning</sup> ~~more~~ soft, and regular  
but in the evening, ~~as~~ hard, intermittent, 100 and quick. His great trouble is  
an accumulation of phlegm, which is after an effort coughed up through the opening  
left in his wound. The deep part of his wound had a grumous appearance, a  
dirty green colour which I think a little unfavourable. The idea is to heal by granu-  
lation. Cold water, through a wet cloth laid over the wound constitutes the  
treatment thus far, this seems to be pleasant to him. Injections had an operation. Nutritive  
enema are given him of beef tea.

Case 6<sup>th</sup> General Dropsy

39

July 1<sup>st</sup>

Henry Boyle came into the wards, with the whole of his body oedematous; some time ago says he had Intermittent fever. His tongue is white, and moist. Put him on cream of Tartar and Cider Mixture

" 2<sup>nd</sup>

About the same.

" 5<sup>th</sup>

Improved, penis, and scrotum not so large. An irregular action of the heart detected. Tongue white, and moist. Pulse rather strong, and of a good size. Continuing the same treatment

" 6<sup>th</sup>

Complains this morning of a sickness of stomach. Tongue broad, and creamy. Pulse compressible and ~~and~~ continued the above treatment

" 8<sup>th</sup> Still complains of nausea. Stockings becoming too loose for him.

Bitart: Potash ʒi

Talap

ʒss vi

To be taken as a purge

Besides this powder he takes Cider Mixture

" 9<sup>th</sup> Pulse 100. Thinner. Pulse 100.

" 11<sup>th</sup> Improving very fast.

13<sup>th</sup> Giving the purge now less frequently.

15<sup>th</sup> Getting better.

20<sup>th</sup> The Dropsy has all disappeared except in the abdomen where it still obstinately remains

Has been complaining of sick stomach and nausea  
after swallowing anything.

Aug 8<sup>th</sup> Has been very weak for the last two or  
three days. The pulse small and feeble and  
the effusion almost entirely left him except  
in the abdomen which still obstinately remains.

Aug 10<sup>th</sup>

Gradually declining.

Aug 14

Has lost his appetite. Pulse can hardly  
be felt.

Aug 16<sup>th</sup>

Yesterday was tapped. Feels to day  
much relieved. Pulse is better.

Aug 17<sup>th</sup>

Pulse weak. Prognosis bad.

Aug 20

Pulse stronger. prescribed this morning  
according to Dr Haines advice

℞ Ferri Boracis grs xviii

℞ Pulv: Quiniae grs xii

℞ Ft. pil. xij

℞ one every 4 hours.

Aug 24<sup>th</sup>

Died last night.

Case of Mania-a-Potu.

July 9<sup>th</sup> 1850

Tongue coated over with a substance resembling Mustard. Pulse 100. Eyes red and Inflamed.

" 11<sup>th</sup> Tongue still coated. has had a nap, and is consequently much better.

" 13<sup>th</sup> Still continues to improve.

General Dropsy et Dysentery

Aug 30<sup>th</sup> came in with his whole body  
swelled. ordered

Pulv. Clav. grs  
Zilla grs x 10  
Pulv. Polyp. Zi  
St. ft. pulv. viii  
To be every 6 hours

Aug 31<sup>st</sup> Has taken four powders, complains  
of feeling very cold. A bellows sound  
was detected over the region of the heart  
ordered a blister over the cardiac region

Aug Sept 1<sup>st</sup> Not much diminution of  
swelling.

Sept 3<sup>rd</sup>

Found him with symptoms  
of Dysentery. the swelling much less.  
stopped the powder and ordered Quinine  
and Acet. plumbi and Opium after each  
evacuation.

Sept 4<sup>th</sup>

Stools running from him involuntarily  
with blood. Much thinner on account of the  
dysentery. I think it will cure his dropsy.

Sept 5<sup>th</sup>

Died this morning of Dysentery.

Loss of debility and disordered condition of the blood,  
the result of Typhus Fever (Probably)

July 9<sup>th</sup>

James Brown came into the wards with his  
legs and thighs marked with ~~the~~ exanthema-  
tous red patches resembling somewhat the  
mark of a blister. Very much emaciated and  
with a tongue exceedingly coated with a  
thick hard, ~~and~~ dry and brown coat.  
Giving him Rum Herbinth: and) Beef tea.

July 13<sup>th</sup> To day Erysipelas attacked his face.

" 15<sup>th</sup> In the two intervening days. he has been  
attacked with erysipelas in the face, which  
was promptly checked by the use of Nitrate  
of Silver. Smear'd over It. Pulse still feeble.

" 20<sup>th</sup> Weaker this morning by reason of a diarrhea which  
I has set in. ordered him this morning Hops Mist.  
with Krameria

Hops Mist 3iv.

Er: Krameria 3i

" Opium 3ii

" 22<sup>nd</sup> Takes Brandy Punch 3ii every 2 hrs.

" 24<sup>th</sup> Still takes Brandy with the addition of  
Carb: Amic his diarrhea being stop't the Hops  
Mixture &c was discontinued.

" 29<sup>th</sup> Looks brighter this morning. Always feels better  
tho' he being sponged all over with cold  
water. His whole body is covered with a dry  
scaly coat which separates from the cuticle  
when even slightly rubbed.

" 29<sup>th</sup> Died last night from sheer debility and innutrition

# Mrs G's Case *Ind.*

May 9 Missed the Catamenia

May 11 Sick at the stomach & loods moved at 12 ~~P.M.~~ midnight.

May 12: morning nausea and bad taste

" 13<sup>th</sup> ditto

" 14 "

" 15 " Breasts tender to the touch

" 16 " No Kneeling after standing, two days

" 17<sup>th</sup> "

" 18<sup>th</sup> " Not so much morning nausea

" 19<sup>th</sup> "

" 20<sup>th</sup> " No symptoms now except absence of Catamenia, and a burning spot over the <sup>last</sup> false ribs of the right side

" 21<sup>st</sup> " No morning <sup>nausea</sup> ~~but~~ thirst. Nausea and attempts to vomit after dinner

" 22<sup>nd</sup> " No ~~nausea~~ complaints. Nausea after dinner, chill (slight)

" 23<sup>rd</sup> " at 9<sup>1</sup>/<sub>2</sub> P.M. which lasted an hour or ~~two~~, succeeded by nausea

" 24<sup>th</sup> " Nausea through the day, chillings.

" 25<sup>th</sup> " No nausea or chillings to day, has been very well. Breasts for the last week have been, according to her account, enlarging

" 26<sup>th</sup> " Nothing new.

" 27<sup>th</sup> " Chills slight through the afternoon and night. A very severe head-ach just before 6 A.M. (left side) and back part. Nausea in the afternoon & night.

" 28<sup>th</sup> " No complaints.

" 29<sup>th</sup> " " "

" 30<sup>th</sup> "

" 31<sup>st</sup> " Nausea, and bad taste in the mouth all day.

June 1<sup>st</sup> " Slight nausea in the afternoon & evening, with bad taste in the mouth

" 2<sup>nd</sup> " " "

" 3<sup>rd</sup> " " "

" 10<sup>th</sup> " Says her urine for the last 2 or 3 days is thinner & whiter than usual. Passes it 8 or 10 or 12 times per nocte.

# Case of Acute Dysentery

Boonen a lad aged 18 three days before his appearance in the ward was attacked with dysentery. his case is as follows

July 13<sup>th</sup>

Has been up very often during the night. Tongue red, and marked with small white spots. Pulse 100. ordered the following powder to be given him during the day.

Hyd: chl: Miso gr vi

Pulv: Ipecac: et Opii 3f

Mf: pulv vi ~~as a tea~~ <sup>as a tea</sup> ~~to be~~ <sup>to be</sup> taken every three hours.

July 18<sup>th</sup>

Ordered him this morning ~~at 10 o'clock~~

Blue mass gr XXIV

Calamin gr XVI

Morphia gr

Mf: pil: viij

July 20<sup>th</sup>

In addition to the above pills

Mist: Creta 3iv

Gr: kino 3i

Opium 3ii

3f tea ~~to be~~

July 24<sup>th</sup>

Pulse frequent

Aug 6-7-8 has been sitting up. is gradually regaining health

July 31<sup>st</sup>

Today sitting up. Pulse still feeble, and irregular. Looks very thin, and

Aug 6-70 Sitting up. Is gradually regaining health.

Complains of his throat. which we for the first time on looking at it, noticed an ulceration beginning on the lateral half arches, applied to them a solution of Nitrate of Silver.

Aug 10<sup>th</sup>

Throat better. found him in bed.

Aug 16

Drumhca returned. perhaps on account of having got up too soon.

Aug 23

Has been in <sup>bed</sup> suffering a relapse. To day prescribed

Lys: Ferri Podicti 3i  
Lq 30 gts 3 times a day.

Sept 1<sup>st</sup>

Emaciating very rapidly. prescribed

R<sub>2</sub>

Phlu opio a a grs iv

Mist pil xvi

one every 4 hours

Sept 3<sup>rd</sup>

Died after having worn away almost to a skeleton

Henry Esle. Dropsy.

~~Put in Calomel~~

~~Put in Calomel~~

Making Calomel Quill in powder and  
wild Cherry bark and Soda

Effusion within the chest commenced treatment  
July 20<sup>th</sup>

Put in Calomel powder gr; daily

July 28<sup>th</sup>

Gums, and Mouth little sore. Absorption  
not noticeable.

Aug. 7<sup>th</sup>

According to the Nurse's Account fled last  
night. ~~to~~ <sup>from</sup> the Nose. which was  
finally stopped by plugging the Nostril up  
with cotton soaked in Aq. Calcis. Stopped the  
Calomel.

Aug 8<sup>th</sup>

No return of Epistaxis.

9<sup>th</sup> His chest is gradually coming into its proper  
form.

Aug 14

declares himself much better,  
swelling rapidly diminishing. Yeiser-  
say had another blister which answers  
very well

Sept 4

Chest symmetrical. No respiration heard and  
flatness upon the affected side.

Cutting stomach test <sup>Ind.</sup> Bilious Diarrhea of a child 2 yrs old  
August 4<sup>th</sup>

Called to see a child cutting the cuspidate.  
St. Father said it had "Flux". Saw a ~~greenish~~ stool  
which looked very much like pieces of chewed spinach  
floating in a mixture of urine and serum.  
Skin natural. Blue eyes. Fair complexion. Healthy looking  
child. Mother says it is disposed to be drowsy.  
Saw no symptoms of metastasis to the Brain.  
No heat of surface or Fever. Very Restless.  
Ordered a mustard pediluvium! and if the head became  
hot, to apply cold to it, and use the mustard ~~both~~  
pediluvium, and if necessary, mustard Plasters to the  
Gastrocnemii. Ordered one of the following Powders after  
every passage. Magnesia bals each powder contains  
3grs of each Rhei

Acacia aā 3℥  
Pulv: Sto X

Called 5 hours afterwards. had 3 Operations and had taken 3  
powders. or 27 grs = 9 grs of Rhei + 9 grs Magnesia + 9 grs Acacia  
Pa and Ma very anxious about Mary. Ma said her  
stools "were just like water" "But the last one not so  
green". Stopped the Powders. and ordered a mustard  
pediluvium at bed time.

August 5<sup>th</sup>

Found her bright as a button, and Ma much  
pleased. Stools almost natural.  
Left some general directions, and made my  
bow.

## Typhus Fever.

July 20<sup>th</sup>

Low muttering delirium, picking at the bed clothes. Pulse very quick. Skin very hot ordered him to be cupped back of the neck and the head to be shaved and blistered.

July 23<sup>rd</sup>

Pulse frequent and weak. Face flushed. Tongue very dry and hot. Has been to stool three times during the night. No tenderness upon pressure over the abdomen.

" 24<sup>th</sup>

Tongue moist, pulse frequent and weak, delirium lessened. Still deaf.

" 25<sup>th</sup>

About the same. Pulse keeps frequent and weak.

" 26<sup>th</sup>

Tongue hot and dry. Skin moist and warm.

27-28<sup>th</sup>

Troubled with diarrhoea. Pulse small and weak. Tongue hot and dry. Peculiar Typhus Odor.

29<sup>th</sup>

Countenance more natural. Pulse stronger and fuller. Tongue clearing off and becoming moist. Typhus odors not so perceptible.

31<sup>st</sup> Pulse softer and more regular. Tongue becoming clean, and moist. Perspires profusely.

Aug 1<sup>st</sup> Pulse quick and frequent, tongue does not look so well having a few brown patches upon it and not so moist.

Leeds Aug 3<sup>rd</sup>

A change for the worst, evidently showing  
that his system has been too much prostrated  
by the fever, to react from the attack of Diarrhoea  
which set in about 2 or 3 days ago. Skin cold.  
No pulse scarcely at the wrist. Ordered beef  
and wine when.

Aug 4<sup>th</sup> Died this morning 9 o'clock

James Taylor, Scotchman.

July 23<sup>rd</sup> Came in, with his back covered with an eruption. which according to his own account was contracted at sea. There did not appear to be any itching. Put him on low diet and gave a purge of salts

" 25<sup>th</sup>

about the same. ordered to day 10 gts of Fowler's solution every three hours.

" 26

Continues the Fowler's solution.

" 29. ~~The Fowler's solution~~ becoming Complains of a soreness about the stomach, which I suppose owing to the Arsenic and ordered it to be stopped

Aug 6<sup>th</sup>

began the Arsenic again. Itching gone and the eruption gradually fading

Aug 8<sup>th</sup>

Decided diminution of the eruption. Continued the Fowler's solution.

Care of Lurvey

July 28<sup>th</sup>

20 or 30 purple spots on his right leg.

Gums swelled and very soft, and vascular, inso-  
much that when I slightly pressed them they  
bled. ordered him potatoes and Citric Acid water  
to drink

July Aug 6<sup>th</sup> Still in the wards. Gums in the same  
condition

Aug 7<sup>th</sup> Still in bed. Gums still swollen and  
soft and vascular

" 10<sup>th</sup>

Remarkably disposed to lie in bed and  
~~amused~~ away his time; seemingly from sheer  
indolence.

" 11<sup>th</sup> Still, easily lounging in bed.

---

Appearances in a man a week after he  
~~took~~ taking 40 drops of Fowler's solution.

April 28<sup>th</sup>

Complains of being sore vomiting this morning

April 29. Right limb oedematous. And an erysipie-  
latus redness on the posterior superior portion of  
the thigh extending almost down to the knee

May the 1<sup>st</sup>. Two large water blisters on the upper part  
large blue veins, traversing the fore part of the limb.  
Limb swelled very much. Has been delirious in the  
night. Phlegm extends down the foot. Discovered the same

appearance in the other leg in the calf. Pulse very small and  
feeble. ordered 163 of Brand's punch. Died 3 o'clock P.M.

May

Case of Scabies where Cresote ointment was tried.

Aug 3<sup>rd</sup> (Worst case in the ward.)

Wm. Hesenauer came in today with his whole body thickly covered with Scabies. Put him ordered him to be rubbed every morning with the following ointment

Cresote 3℥  
Adeps 3℥

Aug 7<sup>th</sup> Itching not so bad. Says he is better.

Aug 8<sup>th</sup> Evidently better. Can now hardly perceive the eruption.

Aug 10<sup>th</sup> Still, on a fair way to get well.

Aug 16<sup>th</sup> Almost well.

Aug 17<sup>th</sup> Well except over the shoulder

Aug 28 Well except about the calves of his

legs

Sept 1<sup>st</sup> well.

1858 Indianapolis

Continuation of J. B. Elliott's Case of Cat throat.

July 26<sup>th</sup> Wound dry no supuration or granulation, water when taken into his mouth runs freely through his wound, in fact the nurse induces him to swallow water from his mouth in order to wash out his wound. Pulse at one time through the day 140 at another 80. Had a severe chill, in which the nurse says he became blue all over. Starts suddenly when asleep. Muttering constantly in his sleep. Emaciating. Dr Elliott was talking of injecting 15 grs of Quinine as an antiperiodic, and introducing a stomach tube, through which to convey his food. Beef tea, Coffee, Lemon made, by mouth, as some little got into the stomach in that way, and injection.

July 27<sup>th</sup> Skin natural. Expression pleasant, natural. Wound entirely opening & gasing outside edges dry, the bottom appears to be healing, aperture in his Larynx closing. Pulse soft & regular. 80. Nurse says he slept better last night. I have a better diagnosis this morning, am convinced of the folly of sewing up such wounds. It must heal from the interior. I am also convinced of the difficulty of diagnosis in such cases, as to whether the Larynx is wounded, and the what bone of the Trachea, or Cartilages. July 28<sup>th</sup> Pulse natural. One third of what he swallows gets into his stomach, the rest runs out of the wound. Skin natural. Wound looks much better. I have more hopes of his recovery to day than I've had yet. July 31<sup>st</sup> Granulating at the bottom. Feels much better. Skin natural, Pulse rather weak, regular, and about 80, soft. Talking about adding alcoholic stimulus to his diet this morning. Sustained chiefly by injections, about one third <sup>of water he drinks</sup> getting into his stomach. Aug 4<sup>th</sup> Thinner than when I last saw him. Pulse weaker, articulates much better, can understand him. Wound looks well, and Dr Elliott thinks is granulating from the bottom. Does not swallow any better. Still injecting. Aug 6<sup>th</sup> Thinner. Opening still in the Pharynx, I suppose it is the Pharynx. Subulter when asleep p. Aug 10<sup>th</sup> (Aug 7<sup>th</sup>) Pulse stronger. Talks better, wound about the same. Healing very slowly. Aug 13<sup>th</sup> Pulse strong and natural. Thinner, Has been sitting up occasionally in his arm chair supported by pillows. since the 9<sup>th</sup>. Talks better, wound about the same in appearance. Swallows about  $\frac{1}{3}$  of his food. Still unable to take solid food.

Mania-a-potu combined with Erysipelas.

Aug 3<sup>rd</sup>  
Came in the wards about a wk ago with symptoms of Mania-a-potu, which soon afterwards developed themselves. At the same time Erysipelas attacked the right cheek. The Mania-a-potu was treated in the usual way, and the cheek painted with (tincture of Silver) (solid stick)

Aug 8<sup>th</sup>  
Found him this morning very rational and the Erysipelas not spreading

Aug 9<sup>th</sup>  
Found him sitting up in bed this morning. Pulse rather feeble. His face looks to me about the same. He ~~seems~~ rational.

Aug 10  
Erysipelas checked. And altogether much better can now hold out his hand, without evincing the least tremor. Pulse though weak, is soft, and regular, wants to get up and go to work.

Aug 12<sup>th</sup>  
Erysipelas and Mania-a-potu both almost gone.

Aug 14<sup>th</sup>  
Sitting up. No trace of either Erysipelas, except in the eye of the affected side which is very red, but not accompanied with any inconvenience or pain, or Mania-a-potu. Reduce his stimulants.

Aug 22

Entirely well.

Enlarged liver.

Case March 9<sup>th</sup>

Dr Wm Hooper Dispensary Physician, was kind enough to show me this case. The patient was an Irishman, 46 yrs old. According to the doctor, this swelling became as ~~large~~ extensive as when I saw it, in a weeks time. The hypochondriac region of the left side and ~~the~~ as low down as ~~the~~ half the distance between the umbilicus and symphysis pubis and almost to the crest of the ilium of the right side, was dull, the patient wincing when pressed over the epigastric region. - more than when pressed over the liver. The tongue was thickly coated in the middle and back part with a white fur, very white like chalk, and was red at the edges. Stools according to his wife were yellow. Urine filled with mate of ammonia. Bilious Temperament.

Boils covering the whole body.  
A very distressing case of ~~Depressed~~ <sup>Depressed</sup> ~~constitution~~ <sup>constitution</sup>

Michl. Leston age 30 came in with his whole body covered with large boils

Aug 16<sup>th</sup>

Covering the boils with flaxseed poultice and giving

Decoction of Lassa parilla.

Podids of Potapa Zi.

Aqua 3v.

Tablespoonful 4 times a day.

Aug 20

To day he is better.

Aug 28

Much better.

Sept 9<sup>th</sup>

Well

Continuation of Elliott's Case

Aug 16<sup>th</sup> Nature doctoring slowly, surely, and effectually. <sup>sonat</sup> Natura ~~cusat~~ <sup>cusat</sup> Doctor ~~cusat~~ <sup>cusat</sup>. Speaks very distinctly. Walks now around his room. Expectorium good. Cicatrix on each side  $\frac{1}{2}$  inch in length. Aug 24<sup>th</sup> Expectorium almost natural. Sitting up in his chair. Articulation much better, no difficulty in understanding him. Swallow all his fluid food, by depurum, the chin. Still a large gap.

Case of Tinea capitis.

Sept 1<sup>st</sup>

Using Ung. Sulphuretum Iodidum

Sept 11<sup>th</sup>

Child well

---

Purulent Ophthalmia

Sept 1<sup>st</sup>

Child aged 4 yrs. Eyes entirely closed and very much inflamed outside, when forced open large quantities pure pus flowed from them. Began the case with dropping a 4 gr solution of Nitrate of Silver into the eyes every night and morning ~~combined~~ also 3℥ of Magnesia 4 times a day

Sept 3<sup>rd</sup>

Ordered two small blisters behind the ears <sup>with</sup> the above treatment ~~combined~~

Sept 4<sup>th</sup>

Substituted 2xx gr solution for 4 gr

found

Sept 11<sup>th</sup>

Can open his eyes, and look about him. little inflammation left in the eyes yet

Feb 22<sup>nd</sup> 7 10 O'clk A.M. Found her sitting by the fire. Says she is no better or no worse, likes the  
 slippery Elm wash better than the other. Took all the powder, operated ten or  
 had two, or three, passages. Hardly know yet what it is, still inclined to the belief of  
 Erysipelas in a mild form. She has had this 10 days, says it commenced with  
 burning, and itching and swelling. Says she has an acid taste in her mouth  
 in answer to my question. Tongue clean. Pulse small and harder than ordinary  
 she says she has a small pulse always. 80. Says she could go to work at washing  
 if her skin did not burn and itch so. Prescribed half a teaspoonful of Magnesia  
 for the Acidity. and the <sup>Liq. Pot. Permangan. 3℥</sup>  
<sup>Sacchar. Rub. 3℥</sup> as a feeler. There are not enough Con-  
<sup>Aqua menth. 3℥</sup>  
<sup>Aqua de Rub. 3℥</sup> stitutional symptoms for Erysipelas, as  
 74. S. Tablespoonful three times a day. she has had it 12 days now.

4 1/2 P.M. Better, swelling, less, no change in treatment, except to intermit during the night.  
 Feb 23<sup>rd</sup> 4 1/2 P.M. Arms & legs swollen and tender to the touch. Has taken about 400 of Foul-  
 solution. No pain in the stomach. Still complains of burning, and itching in her  
 arms & legs. Prescribed the Arsenical mixture 2<sup>nd</sup> daily. Still using the Elm wash.  
 Feb 24<sup>th</sup> 4 1/2 P.M. Up attending to her work. Arms & legs swollen, the disease still  
 lingers about the upper third of the arm, in the form of an erythematous  
 swelling, tender to the touch. Complains still of the burning, and tingling.  
 I think the Foulers solution has done good service in this case. 3<sup>rd</sup> Table-  
 spoonful twice a day after eating. March 3<sup>rd</sup> Arms well except a squamous  
 eruption on the middle of the arm. Looks well. Was scrubbing her floor. Is not  
 now and has not been taking any medicine since my last visit.

September.

Case 1<sup>st</sup> Hepatitis.

Sept 12<sup>th</sup>

Pulse quick. Surface of the skin has begun to assume a yellow tinge. Extreme tenderness over the liver. Ordered 12 cups over the region of the liver and Wild Cherry Bark & Today

Sept 18 Jaundice increasing

Sept 18

Lied down to the bed. very yellow. Face has a very wild expression. very tender over the Hepatic region

Sept 20<sup>th</sup>

Le Not so unwell. Tenderness over the liver diminished. ordered a blue pill every 8 hours in addition to the above treatment.

Sept 27<sup>th</sup>

Much Better. for the last 4 or 5 days has had a diarrhoea for which he has taken Dover's powder.

Sept 28

Came in with oedema of the legs. ordered  
Cider mixture.

Sept 19<sup>th</sup>

Was seized last night very suddenly  
with great dyspnea which threatened to  
suffocate him. and an acute pain over the heart  
ordered a blister over the heart and 12 Dry cups  
for the dyspnea

Sept 20<sup>th</sup>

found him much relieved in every  
way excepting a pain, which he complains  
of in the right shoulder.

---

This month; the chief diseases were  
Intermittents and Dysenterys. in the (New  
Medical.

October. Surgical.

65

Venereal. (Mens)

Oct. 15<sup>th</sup>

Came into the wards with his testicle of the left side enormously enlarged to the size of a half a foot ball and also a boring ulcer extending 2 or 3 inches up from its opening into the cellular tissue of the groin. Opening about the size of a quarter of a dollar. ordered the ulcer to be injected with Diluted Nitric acid 10 gtt. to 3i

Oct 22<sup>nd</sup>

Stopt the Nitric acid wash on 17<sup>th</sup> and substituted for it, Black wash, and the wash to be injected twice a day, into the ulcer. Has been under this treatment for a week, and the sore begins to assume a very healthy appearance, granulations rapidly springing up.

Nov 7<sup>th</sup>

Was lapped yesterday, and today his scrotum is much smaller. The ulcer ~~about~~ after having appeared to begin heal has remain somewhat stationary.

Nov 8<sup>th</sup>

Ordered the Scrotum to be bound with sticking plaster, to promote absorption of the fluid.

Urs: Surgical. (~~Robertson~~)

Oct 16 Emma Hamilton age 2, came with  
Erysipelas of the neck on the right side. On  
account of which her swallowing was much  
interfered with. Along with this there was a very  
fetid breath. Painted the whole of the swelled  
surface with Lugol's solution of Iodine  
which caused the whole of the painted  
surface to be covered with blisters the  
next day. Exceeding ly painful to the touch

Oct 20

Swelling not so large. but gave for  
the fetidness of breath.

Aqua Chlorinata ℥iv

℞: Myrrh

℞: Creosote

℥i

℥viii

Oct 22

Stop the creosote because of its making  
her sick and prescribed

Aqua Chlorinata ℥iv

℞: Myrrh

(with gang)

℥i

Oct 24

Fetid smell of the breath gone. advised  
her to take a Tabl<sup>ts</sup> compound three times a day of the  
Oct. following

Oct 2

November 1<sup>st</sup>

The opposite side, beginning to swell  
ordered a ~~Calceol~~ poultice and Hydrated potash

Nov 5<sup>th</sup> The opposite side was lanced this morning by Dr Graham and the poultice applied.  
N.B. This was at first supposed to be a case of erysipelas.

Nov 10<sup>th</sup> Complained of a cough. for which she took  
34 Lys: Seneka  
Lilla  
Lig: Bel'm onthio aãzi

Nov 11 Complained this morning of the medicine causing a pain in her head, and vertigo.

Nov 15<sup>th</sup> Still complains of piddiness, and vertigo in the head after taking the cough medicine. There is still a swelling from the abscess of the neck.

Dec 3<sup>rd</sup> Neck healed.

Case 3<sup>rd</sup> Margaret Rupells Case.

Oct 15<sup>th</sup> came into the surgical wards  
(was) with her fore finger presenting an  
the appearance of being lacerated, which  
upon examination proved to be the result  
of neglected whitlow or felon. Upon inquiry  
our suspicions were verified her whole  
finger was one mass of lacerated surface  
having sponged it, ordered a Canot poullice

Nov 4<sup>th</sup>

The continual application of the Can-  
not poullice has made the finger almost  
well.

Nov 7<sup>th</sup>

The finger has all healed except in  
two little spots about the size of a pea  
continuing the Canot poullice.

Nov 14<sup>th</sup>

The dressing reduced to simple dress.

Nov 16<sup>th</sup>

Looked this morning as if it was getting  
worse as if an ulcer was beginning to be formed  
on the end of the finger. Owing no doubt to some  
indulgence in Diet.

Dec 3<sup>rd</sup>

Fangous like appearance on the end of the finger.

Dec 5<sup>th</sup>

Finger looks red and the ulcer the coming  
larger. ordered Bread and milk poullice.

Dec 10<sup>th</sup>

The finger still looks obstinate and undispersed to heal. ~~The~~ the loosened and decayed nail was extracted was caused much pain.

Jan 15<sup>th</sup>

Up to this date the sore has not yielded to any remedy the last thing used was a solution of Chloride of Zinc gr i to 3i. Two days ago I commenced, at the suggestion of Dr. Pagar, to touch the sore around the edges with lunar Caustic. Today I think it looks better.

Jan 17<sup>th</sup>

The finger has improved under the caustic touched it again today.

Jan 20<sup>th</sup>

Did not see her today. Touched it yesterday. Getting better.

Jan 24

Found her this morning with her face swelled and very much salivated. She has been using besides the pills, Calomel in an ointment.

Jan 25<sup>th</sup>

Face still swelled very much. ordered lead water and pulv. Iannin.

Jan 27<sup>th</sup>

Face better. did not examine the finger. Jan 28<sup>th</sup> Face better ordered a poultice for the finger. Sore beginning to heal from the circumference. in the middle there is a slough the size of a twelve-pence.

Nov 1<sup>st</sup> James Cox came into the venereal ward  
with two large buboes in each groin, one  
having broken before his admission. The  
other I lanced. ordered both to be injected  
with Aromatic wine.

Nov 5<sup>th</sup>

Yesterday the <sup>opening in the</sup> right bubo on the  
right side was enlarged by Dr Graham.  
This morning they both looked red, and  
inflamed, with a healthy appearance.

Nov 7<sup>th</sup>

Bubo of the right side filled with  
pus ordered it to be kept filled with lint  
soaked in Aromatic wine. The buboes also  
to be injected with the same.

Nov 8<sup>th</sup>

The buboes look very red and angry this morning.

Nov 15

No change in the appearance of the sores.

Dec 5<sup>th</sup>

The buboes look about the same except  
on the right side, which has been for  
the last three or four days been touched  
with nitrate of silver (solid) on which granulations  
are springing.

Dec 10<sup>th</sup>

The buboes are showing a disposition  
to run under the skin, which was only no-  
ticed to day.

Dec 18

Still in the wards. For the last four or five days the buboes have been barrowing under the skin until sinuses two inches in depth have been made. These have been injected with 10 grs sol of Nitrate of Silver and then filled with lint soaked in Vin: Aromat. They are now improving the sinuses are filling up and the sores assuming an healthy appearance. They have been touched daily around the edges with lunar caustic.

Jan 13<sup>14</sup>

Since the last date Quinine in powder has been sprinkled over the surface of the ~~last~~ left bubo. It now presents a healthy character the specific appearance of the sore having vanished. The right bubo which was accompanied with a sinus extending down the thigh about an inch, has entirely closed up with the exception of an opening the size of a six pence. Treating them now as simple sores with simple cerate.

Jan 17

Ordered a poultice for the left bubo as it runs a good deal of matter last night.

Jan 18

The sore on the right side healing around the edges continuing the simple cerate. The other to be stuffed up with lint as there is still a hole large enough to insert the end of little finger

Case of ulcer at the elbow joint.

Nov 3<sup>rd</sup>

The ulcer was about the size of a sixpence and had been ~~on the account~~ according to the patient's account has been very troublesome by breaking out after it has been healed over, and after falls upon the elbow. ~~ordered his arm to be~~ When I first saw him, it was a little hole through which you could see the projection of the olecranon process. Ordered his arm to be straightened, and kept so with a splint.

Nov 5<sup>th</sup>

Ulcer entirely healed over. Left off the splint this morning.

Nov 9<sup>th</sup>

Still in the wards the cicatrix not having yet become strong enough for the man to use his arm much in work.

Nov 12

Perfectly well, and left the wards to go to work.

Dec 1<sup>st</sup>

Found to day a little hole which extended through to the bone. Ordered iodo-cresol into it (10 gr to 3i).

Bubo and Oedema of the Prepuce.  
Nov 7<sup>th</sup> Jas. Smith & Co.

— Came in the ward with a bubo and oedema of the prepuce. The prepuce covering the glans penis and creating a kind of Phymosis. Ordered. I lanced the bubo. and ordered it to be injected with aromatic wine. The prepuce to be injected with black wash Cal Zi. and a laudanum poultice to Agil Calis 3vi. be applied.

Nov 8<sup>th</sup>  
~~Drop the Black wash, and substituted cold applications.~~ Ordered cold applications applied in addition to the black wash.

Nov 9<sup>th</sup>  
The prepuce can now be drawn over the head further than it could before the wash was used.

Nov 16<sup>th</sup>  
Still continuing to improve.

December. 2<sup>nd</sup>  
The prepuce can now be drawn over the glans. A large phagedena was discovered ~~under the~~ on the inside of the prepuce and partly on the glans. touched it around the edges with lunar caustic.

Dec 3<sup>rd</sup>  
The ulcer was touched this morning with Lunar Caustic.  
continued on.

Erysipelas of the face and body.

December 2<sup>nd</sup> / November 20<sup>th</sup>

Catherine Dunphy came into the wards with her eyes and ears, and whole face swelled, and her whole countenance much disfigured with erysipelas. Painted the border of sound skin pretty freely with nitrate of silver. (solid). And ordered her a purge

December 1<sup>st</sup>

Found the disease extending over the caustic mark and extending down the back. No movement of the bowels ordered her Croton oil in pills combined with other purgatives.

December 2<sup>nd</sup>

This morning we found the redness extending still further down the back and under the arms. The pills which were given yesterday have operated. Today whole surface extending from the back of the head down to the 1<sup>st</sup> and 2<sup>nd</sup> Dorsal vertebra was painted with Iodine. The pills were

℞: Iodine grs ii

℞: Hydrarg: grs X

M. ft. pil iii

P.S. The first and second pills were given without any effect. Had vomiting to come

December 3<sup>rd</sup>

The erysipelas is leaving the face and extending down the body. Continuing the Iodine and giving internally Quinine & Beef Tea. She is now able to see.

December 5<sup>th</sup>

To day it is as low as the Sacrum. Pulse 128. with a hot, dry skin. Tongue not so much furled. Touched part way around with Iunar Cautic.

Dec 6<sup>th</sup>

This morning says she is better. Pulse 100 Tongue not so much furled, but cannot yet protrude it with ease. Night the sedes has not descended any farther down the body. Night before last was delirious of a child.

Dec 7<sup>th</sup>

Dec 9<sup>th</sup>

Pulse 100 and quick. Tongue moist and whitish. Skin dry.

Dec 10<sup>th</sup>

The erysipelas spreading down. The legs. Painted it around with Iodine.

Dec 11<sup>th</sup>

Two little abscesses upon the upper eyelids were lanced. This morning seems very languid. and is constantly moaning. Pulse soft and of ordinary frequency. Tongue moist.

Dec 12<sup>th</sup>

Much better this morning. Pulse almost

natural.

Dec 13<sup>th</sup> Complains this morning of pain at night in the thigh where the cystic vessel is.

Dec 17<sup>th</sup> Complained last night of a painful little abscess which made its appearance on the back part of the scalp, ordered a poultice. This morning still complaining. The other symptoms however are gradually leaving her, her eye looks brighter and her pulse feels more natural.

Dec 18<sup>th</sup> Another abscess forming just below the scapula.

Dec 18<sup>th</sup> The abscess on the back is all that now demands attention. This has been poulticed and shows an appearance of suppuration.

Dec 20<sup>th</sup> The appearances of the ~~abscess~~ swelling I think this morning are I think against my diagnosis of its being an abscess. As the poultices which have been applied, have not the least effect, ordered one to be put on again today.

Jan 13<sup>th</sup> Up to this date my patient has been daily complaining of a pain in the left thigh. The ~~abscess~~ swelling in the back has disappeared. The large hole which was left from the abscess back of the head is filling up fast.

Rubo and Oedema of the Prepuce. (Continued) from  
December 4<sup>th</sup>

The phagedena is still extending.  
Touched it again with subate of Silver.

Dec 6<sup>th</sup>

The prepuce this morning could not be  
drawn <sup>back</sup> over the glans so that the ulcer  
could not be seen.

Dec 7<sup>th</sup>

Nothing unusual.

~~Dec 8<sup>th</sup>~~

Pulse 100 and quick. Tongue moist and  
thin.

Dec 9<sup>th</sup>

The ulcer was again touched with Lunar Caustic.

Dec 10<sup>th</sup>

The ulcer was touched this morning  
pretty freely with Lunar Caustic.

Dec 12<sup>th</sup>

No longer extending. Touched it this  
morning with Lunar Caustic.

Dec 12<sup>th</sup>

Pulse 98 Touched again ~~to~~ day with Caustic.

Dec 13<sup>th</sup>

Complain of erections at night gave  
him Camph and Opium. Ulcers not becoming  
smaller.

Dec 17<sup>th</sup>

Had an erection last <sup>night</sup> notwithstanding having  
taken grs ix. of Lupulin and the same of  
Camphor with a third of a grain of opium.  
The ulcers healing up under the caustic.

Dec 17<sup>th</sup>

Had another erection last night in spite of the pills. The ulcer upon the left side of the gland is better. Cold cloths were also applied without any effect. Ordered a slippery elm poultice.

Dec 18<sup>th</sup>

Has had no erection last night. The ulcer on the right side still looking red and inflamed. The other healed over entirely.

Dec 19<sup>th</sup>

Had another erection last night.

Dec 20<sup>th</sup>

Had a good look at the termination of the largest ulcer, which as far as I could see extended little below the corona glandis. Touched it again with the Lunar Caustic.

Dec 21<sup>st</sup>

Edema of the prepuce. touched the ulcer to day again.

Jan 13<sup>th</sup>

Up to this date he has been fast improving his penis with the exception of a scar the size of a five cent piece looks perfectly natural. He has been using the Swan's ointment only for the last week or two.

Jan 15<sup>th</sup>

discharged from the Hospital, well.

James Cox's Case Continued (Buboes)

Jan 20<sup>th</sup>

Keeping nothing on ~~the~~ <sup>the</sup> Buboes, but simple cerate. And filling the left side with lint and injecting it with aromatic wine.

Jan 21<sup>st</sup>

Bubo on the left side beginning to heal around the edges and filling up with granulations. The other is healing very fast.

Jan 22<sup>nd</sup>

Found something like a sinus in the Right. bubo The whole surface was painted pretty freely with lunar caustic, so also was the Left.

Jan 24

Buboes look about the same as yesterday.

Jan 25

No change perceptible from yesterday.

Jan 27<sup>th</sup> Still look about the same.

Jan 28 No change.

Jan 29

A narrow border of healthy skin has been this morning around the wide bubo ordered the buboes to be washed once or twice during the day with a one or two grs of <sup>Prun.</sup>

Jan 30

The border observed yesterday becoming larger cont. treatment

## Secondary Syphilis.

8

Lysan Wilhelm came in covered with  
chancrous looking sores. on her throat also  
ulcerated and a chancre in <sup>the</sup> left corner  
of her mouth. The scalp was covered  
with sores and abrasions. The bridge  
of nose also had an ulcer upon it.  
The vagina was examined, and was  
found covered with chancre, as was  
also the labia.

Dec 6<sup>th</sup> 10<sup>th</sup> The sores upon the scalp healing  
under the application of lunar caustic.  
Seems much better in spirits.

Dec 13<sup>th</sup> Complains this morning of her eye.  
The sores upon the scalp have all healed  
except one or two, under the use of the  
Nitrate of Silver (solid). Her throat  
which was troublesome yesterday  
to her has been relieved by the 5 gr sol of sil  
applied by means of a camel's hair brush.  
Complains also of a hot fever at midnight.

Dec 17<sup>th</sup> Scalp healed over. Eye feels very painful.  
~~The patient is now much better.~~

Dec 18<sup>th</sup> Scalp still continuing to improve. The eye  
according to her own expression is neither bet-  
ter or worse. The mucous membrane  
much inflamed. Dropped into it painted

it with a camels hair brush, soaked  
in a Vgrs sol of Nitrate of Silver.

Dec 19<sup>th</sup>

Eye the only thing that required atten-  
tion this morning, which was touched with  
the solution.

Dec 20<sup>th</sup>

The eye better this morning. Applied  
the brush again.

Dec 21<sup>st</sup>

Applied the brush again this morning

Jan 13<sup>th</sup>

All inflammation has left the eye, but  
is very weak, and can not bear the light.

Jan 14<sup>th</sup>

Weakness in the eye gets

Jan 15<sup>th</sup>

Eye still kept shut on account of the weak-  
ness but says she can see better out of it today

Jan 16<sup>th</sup>

Found her this morning sitting reading the  
newspaper.

Jan 17

The eye getting stronger.

Jan 18

Eye begins to look quite well.

Jan 21<sup>st</sup>

Eye quite bright today.

Jan 24

Eye almost well.

Jan 25

Eye well But on her left leg dis-  
covered an ulcer of a circular form

about 3 or 4 inches offside and another upon  
the calf of the leg somewhat larger than  
a dollar.

Jan 27

Did not examine this patient today.

Jan 28<sup>th</sup>

Did not see this patient today. No case.

Jan 29

Examine the ulcers on her leg today.  
found larger and getting worse under  
the Blk wash. ordered the surface of the  
sores to be sprinkled with Calomel. Put  
poultices to the scalp to remove the thick  
scabs which were forming.

Jan 30

~~Face much better. touched the nose  
with lunar caustic.~~

This Amey's Case (Mania - a - Potu)

This patient came into the ward - an 11<sup>th</sup>  
with a slight tremor scarcely perceptible  
in the tongue.

Jan 12<sup>th</sup>

About the same.

Jan 14<sup>th</sup>

Tremor in the hands when requested  
to hold them out. Tongue also more  
tremulous. Pupils somewhat contracted  
ordered Infusio gal Ziv Yalleshoolful every  
3: Calomel  
" a trochida aū 3h 2 hours.

And gets of Act: Qui every hour.  
Jan 15<sup>th</sup>

More Tremor over the whole body. Pupils very much contracted. very restless, passed a sleepless night. pulse small and quick, Countenance a wild look, continued the above treatment.

Jan 16<sup>th</sup>

No sleep last night. continually talking about his affairs imagines there is a woman who he dislikes in the cell with him. very weak and shaking all over like an aspen leaf. Skin feels moist. pulse small and quick increased the Blk Drops to every half hour - cont the other mixture as before.

Jan 17<sup>th</sup>

Start found him this morning very restless and cowardly. imagines there is a company of soldiers outside trying to shoot him. very weak. no sleep yet. continually pulling his trousers and imagining the blanket on his bed is his new over coat which causes him to be very careful of it - rolling it up carefully and placing it upon his pillow. Pulse very weak but stronger than yesterday Has taken from 2 to 3 Doses of Act: Qui. cont: treat:

Jan 18<sup>th</sup>

Slept from 12 o'clock yesterday until 13 without waking with the exception frequent starting and opening his eyes and looking wildly

85

Erysipelas, Cash<sup>d</sup> Dumphrey case continued on.

Jan 14<sup>th</sup>

Great deal of discharge from the sore back of the head this morning. Complained of the swelling in her back this morning for the first time for two weeks. On examining it found ~~it red~~ and a diffused pinkness, resembling Erysipelas.

Jan 15<sup>th</sup>

Opened the abscess under on the back beneath the scapula from which a pint or more of bloody pus was discharged. The pus had collected beneath the ~~late~~ fascia of latissimus ~~mus~~ muscle.

Jan 16<sup>th</sup>

Still complaining of the pain in her hip and thigh of the left side. The sore on the occiput healing up fast no more pain in the abscess of the back.

Jan 21<sup>st</sup>

Hip, and thigh still pains her. Sore on the back of the head nearly healed over.

Jan 22<sup>nd</sup>

Examined the painful leg to day but could not see any thing to account for the pain.

Jan 24<sup>th</sup>

Still complains of pain in her left leg and tenderness upon pressure.

Jan 25

Found her to day sitting up. Did not examine her leg to day.

Jan 28<sup>th</sup>

Says she has no pain now, and can walk better continued the liniment.

Jan 29<sup>th</sup>

Saw the sore back of the head which is almost healed does not complain of her leg found her sitting up.

Jan 30

Says she is great deal better.

---

Amey's Case. Maria-a-Potu Continued

Found the room. Skin in a warm sweat pulse softer and fuller. Drowsy. Ordered the Brandy Mixture every three hours, with 7 drops of Acet. Qui every 2 hours.

Jan 31<sup>st</sup>

Has slept pretty well. Much better. Says quiet. pulse full and soft. Wild expression fast leaving his face. Starts a little yet in his sleep. Stopped the quinine.

Jan 20<sup>th</sup>

Great deal better. Had him moved to the right. Slept well last night.

Jan 26<sup>th</sup>

Treating him now for the dyspepsia which he had when he came in.

Jan 29

~~Is well~~ except anorectic pretty well.

Cancer of the Mouth., Benson's Case,

87

Solomon Benson entered the wards Decr 2 1850  
having been in ~~three times before~~ twice before  
Ally to May 1<sup>st</sup> 1849 he has enjoyed perfect health  
and worked hard at this time he had an  
attack of Pleurisy and Gonorrhoea. he was  
discharged cured. March 1<sup>st</sup> 1850 he felt a  
slight soreness in the roof of his mouth  
soon two small ulcers were perceptible  
The attending <sup>Physician</sup> thinking it owing to decayed  
teeth, had five pulled, but obtained no relief  
he was again discharged, and again  
admitted August 1850. At this time, having  
become discouraged with medicine, would  
not have anything done for him and left  
the House in September 1850, and staid  
out until his present entrance Decr 2 1850  
Since his entrance Decr 2<sup>nd</sup> At this time  
there was a fissure large enough in some  
places to lay the point of your little finger  
in, extending irregularly from one ~~side~~ side of  
the mouth to the other. Dr Graham who had  
the wards at this time put him immediately  
upon the Protopide of Merc and Ptyalised  
him ~~locally~~, the fissure was touched every  
other day with lunar Caustic. The sore  
seemed to get worse under such treatment and  
it was stopt by me ~~who~~ now having charge  
of the ward. He was now given a gargle of  
Breast of <sup>glsiv</sup>  
Ana 3viii and continued ~~so~~ for two weeks

Scarcely any improvement being perceptible  
I changed the gangle to Accian (Nisici qts viii  
Aana 3viii  
use as

Jan 16<sup>th</sup>

The outside of his face much swelled.  
Using Nisic acid gangle, is very suffers a good  
deal of pain and has no appetite.

Jan 17<sup>th</sup>

Gave him the following to be taken internally,

℞ Nisic Chloride grs

ss Aana 3viii

Subsist twice a day.

Jan 21<sup>st</sup>

Made an examination with the  
probe, and found the <sup>Back</sup> inferior part  
of the mouth very much diseased.  
Painted it applied 10 grs sol silver by means of  
a camels hair brush.

Jan 23<sup>rd</sup>

Did not examine the throat to day.  
Complained of the gangle ~~being to~~ making his  
mouth sore. Substituted qts  $\frac{1}{2}$  to 3i

Jan 24<sup>th</sup>

No so much pain in the side of the  
face to day swelling gone down. Cont. Treat.

Jan 25<sup>th</sup>

~~Face still swelled and painful but  
getting better. Did not examine the finger to day.~~

Jan 25<sup>th</sup>

Did not perceive any difference in  
the appearance of the sore touched it with

~~Case of Mania a Potu. Allis. Aug. 1890.~~ 8

10 grs sol of silver applied by means of a  
camels hair brush.

Jan 27 Did not examine him today but says  
it feels easier.

Jan 28 Examined the back part of the mouth  
today and think it looks better. The fissure  
is not so large as it was.

Jan 29 Did not examine his mouth today but he  
is however no worse.

Jan 30 Found him this morning with the  
left side of his face much swelled  
up to his eye.

Cath<sup>rs</sup> (McHale<sup>rs</sup>) Case. Femoral Abscess.

Cath<sup>rs</sup> (McHale<sup>aged</sup>) entered Feby 20<sup>th</sup> 1850, aged 20, having had a fall upon her hip. About three years ago, she was not deterred from work however now then she felt pain in the hip especially in changeable weather. About Septem. October 16<sup>th</sup> 1850 a swelling about the size of a goose egg appeared about the upper third of the thigh. This after an examination was found to contain matter pus which appeared to be under near the fascia of the thigh. It was opened and has up to this time been discharging pus and a sanious fetid matter.

Jan 20<sup>th</sup>

There are now four openings in the thigh which at times discharged very foul. Treatment is altogether Constitutional. ~~with~~ poultices only, as a local remedy.

Jan 21<sup>st</sup>

Complained of pain in the thigh. Treatment same.

Jan 22<sup>nd</sup>

Found over the old abscess a red space from an half an inch long to a quarter of an inch wide in which there were 3 small holes from which a great quantity of matter discharged. Another opening on the lateral portion of thigh which also discharges a thin looking pus.

Great tenderness and pain over the trochanter  
of the affected limb. also a constant pain  
there.

Jan 24

The abscess did not discharge as much  
last night. Troubled very much with night  
sweats which have heretofore resisted the  
"Muriated tinct. of Iron and Sulphuric" acid &c  
put her on R. Lec. Asell. today.

Jan 25<sup>th</sup>

Being to a disposition to vomit, and  
irritability of the stomach did not give her  
the oil yesterday.

Jan 27<sup>th</sup>

Found her complaining of being  
weak. and a diarrhoea.

Jan 28<sup>th</sup>

Found her better. pulse good still  
however weak.

Jan 29<sup>th</sup>

She is taking now and has been for  
the last three or four days pills. every four hours  
Vallett Maf

Quinia Sulphas a a grt

M. M. pil viii

Jan 30

Complains very much of night sweats -  
still taking above pills.

# Caldwell's Case. (Cold)

Jan 18<sup>th</sup>

Jan 18<sup>th</sup>

Observed a depression just beneath the distal extremity of the clavicle, large enough to insert a silver dollar. Immediately suspecting a cavity. put my ear to the spot and detected amphonic respiration and resonance when the patient spoke. examining lower down. Another respiration. Amphonic respiration was again detected accompanied by a metallic tinkling. Put him to day upon  $\frac{1}{2}$  gr Calomel every 2 hours made into pills.

Jan 19<sup>th</sup>

Could not hear the tinkling to day. But in the place of it there was amphonic respiration. perfectly flat on both sides.

Jan 20

Heard tinkling again to day in the same place. Still flat over the left chest lung.

Jan 21<sup>st</sup>

Resonance on the Right and Normal respiration on the left side at the summit of the lung.

Just beneath the distal extremity of the clavicle I thought I could detect amphoric respiration.

Jan 22

Dr. Haines thought there existed a cavity at the summit of the left lung still taking pills first prescribed.

Jan 24

Could not hear the cavity this morning stop the pills as his mouth was getting sore and his gums tender and soft and swelled.

Jan 25

Did not examine this patient today

Jan 27

Did not examine this patient today did not think it necessary found him sitting up and looking ~~bad~~ worse and ~~not~~ complaining of nothing.

Jan 28

Did not examine him today saw sitting by the side of his bed.

Jan 29<sup>th</sup>

~~Did not examine his mouth to hear~~  
~~however no worse.~~

Sudden death in sleep

Jan 30 1860

Jan 31 1860

Jan 31 1860. Suffered by his father's death  
and had something in his mind for his father  
to be buried in the family vault. He was  
very much distressed. He was natural but somewhat with

Vakoleon  
 Mr. Vakoleon's child Marasmus  
 Aug 5<sup>th</sup> Boy, 3 yrs. Has been sick about a week. He  
 was first attacked with ordinary summer complaint.  
 Phenomena. Pulse frequent and full, small and quick.  
 Great emaciation. Expression of his countenance as if  
 the character of his cry and voice like that of an old man.  
 Mouth covered with white ulcers & whitish coating,  
 patches. Abdomen tender and sometimes enlarged.  
 Stools frequent, consist of small dark, brown and whitish  
 drops. The size of head large; very pale.  
 Mouth kept open. Prescribed R. Nit. G. i.  
 To be rubbed all over three times daily. Pulv. Dov. gr. xvi  
 with cod liver oil. teaspoonful three times daily.  
 Half teaspoonful of Mutton S. one three times every  
 ten every 15 minutes alternately with the same quantity of  
 whiskey punch (one tablespoonful of the best, to two of milk)  
 Abdomen to be kept red with Turpentine. Chlo. as mouth  
 Aug 6<sup>th</sup> Morning. Abdomen more painful. Passages more frequent and feculent  
 no longer. Pap about a two grains of urine, and half  
 matter. Afternoon. Passages more frequent of green  
 green color, a little more. Treatment as above, except dropping  
 the turpentine. ceased to have any effect on his skin. or only slight  
 the abdomen with Comp. Y. of Odine. Tongue half clear  
 from the tip. Evening 8 P.M. the roads become to be stupor.  
 Aug 7<sup>th</sup> Mouth cleaner. Operations less frequent and less green.  
 Continued the whiskey punch & the turpentine, and continued with cream sugar

Ridgely Case, Cold, Throaty Case

97

Same in rice water. Treat as before except a little powder which was substituted in Quinine grs iv. The Quinine was given upon leaves of other D.P. 8 or 10 every other day, he was worse.

5 P.M. rice water operations less frequent. Mouth and tongue almost clean. Abdomen as before, only less tympanitic. Rejected rice water and took the Beef Tea and whisky punch. Last night ordered a warm salt and mustard bath. 5 minutes. kept him for min in the bath. Aug 8<sup>th</sup> 4 or 5 operations in the night, a little more a Tacup being used with matter with a yellow tinge. through it, in a gallon of wine.

Ridgely Case Colours

Jan 18<sup>th</sup>

Both sides flat. still has a short cough.

no respiratory murmur. heard over the lungs. put him on 3f Cod's liver oil 3 times day

Jan 20<sup>th</sup>

Still has cough, no difference perceptible either by percussion or auscultation. Still on Cod's liver oil. 3f 3 times a day

Jan 21<sup>st</sup>

Distinguished a faint respiratory murmur on the left side still flat on both sides.

Jan 22<sup>nd</sup>

Did not examine this morning.

Jan 24

No difference in percussion and auscultation. Says he as well as ever he was and looks strong and hearty.

Jan 25

Percussion still flat. Discharged as well.

Jan 28<sup>th</sup> walking about the ward apparently well.

## Suspected Linchons of the stomach.

June 3<sup>rd</sup>

came in with a circumscribed rough and hardened space over the region of the stomach. Complaint of lancinating pains. very tender cannot bear the slightest pressure over the epigastrium. Face haggard. Cheek bones prominent. Does not vomit. stools natural except in colour being rather too white indicating the want of bile. ordered Iodide of Potash internally and the hardened space to be painted over with Tinct of Iodine. The roughened space is from 3 to 4 inches in length and 3 inches wide the long diameter extending around his body the other parallel with the linea alba. It now resembles the cicatrix of a burn.

June 5<sup>th</sup>

Complaint of having no appetite. the swelling was thought by Dr. Thirly to be a little increased. And running over to the left side. he says he cannot lie on the left side. The other appearances the same. Ordered the part to be blistered. the other treatment continued.

### Thackeray case

The urine turbid. Pulse about the same. Treatment, No change. 1 P.M. Pulse 120 to 130 quick frequent & feeble. Operations about the same as to quantity & colour, thinner, and not so lumpy, as last night. Cold sweat on the forehead. Skin perishes. Takes about a teaspoonful of nourishment an hour, because of sleep &c &c interrupting the regular times of giving it. Aug 1<sup>st</sup> 4<sup>th</sup> Voice stronger. Pulse very feeble, scarcely perceptible. 5 green Grapes. Concrete mucoid passages, a qt. of fluid and half tea cup of solid matter. Mouth as yesterday. Returned to the first powder with lip. Dr. Aug. 1<sup>st</sup> 9<sup>th</sup> Dismissed. Not cured. There was an aggravation of the symptoms. Did not better in night! (Distinct) <sup>Indy</sup> Small Pox — Indianapolis Jan 13<sup>th</sup> 1854  
Jan 14<sup>th</sup> Bennet Brookes aged 45. Full habit. Complains of no  
pain. Bowels regular. Face covered with pustules,  
Pimples, on the rest of the body. Breathing  
free, throat not sore.

Jan Treatment. Room well ventilated. Solution  
of Chloride of Soda to <sup>be</sup> thrown about the room.  
Low diet. <sup>Alcal. pot.</sup> one to be given every three  
hours. <sup>Alcal. pot.</sup>  
<sup>Sp. cae.</sup>  
<sup>44 W. pulv. No. 1</sup>

Jan 15<sup>th</sup> Slept well last night. Nostrils stop up  
with ~~seabs~~. Still ~~breathes~~ easy. Has taken  
three powders, had a napage which his  
nurse said smelt very bad.

Jan 17<sup>th</sup> Slept well last night. Pustules on the  
face scabbing off. No sore throat. Says he is as  
fine as a trout. Treat: Stop the powders as  
they moved his bowels too freely. Still on low  
diet. Prepared a Roasted apple for him yesterday  
which he relished very much.

Jan 19<sup>th</sup> Keeps well. Complains of nothing.  
Bowels regular. No medicine.

Jan 25<sup>th</sup> Has been rapidly convalescing.  
and now is well, except the scabbing of  
the pustules.

Remarks This <sup>was</sup> one of the mildest cases; No  
pulmonary, alimentary or Cerebral arrange-  
ment occurred, and very slight irritation cutaneous  
irritation.

had him wash and scrubbed and washed in Lig: Ls: Chlorine  
Discharge on 26<sup>th</sup> of Jan.

Indianapolis

M<sup>rs</sup> Hamilton's Case March 7<sup>th</sup> 1854.

I saw this lady for the first time, medically,  
about a month ago the symptoms which  
then presented themselves were, an anxious  
expression. ~~of~~ Very nervous. ~~on~~ ~~coming~~ ~~from~~ ~~the~~ ~~least~~ ~~fatigue~~. Exceedingly  
troubled about her inability to attend to her  
household duties. Large quantities of urine  
of ammonia passed from the kidneys.  
Pain in the left shoulder, and also between  
the scapulae; No appetite. Cough which was  
slight, Night sweats. Stambles of the legs, which  
she describes by saying that when she  
attempts to draw down her legs in bed  
she feels as if unable to do it.  
Continually thinking of her children in  
Baltimore.  
March 6<sup>th</sup>

Yesterday my patient had spit  
of blood while at church. Today I examined  
her lungs and found not much differ-  
ence between the two sides by percussion.  
But upon putting my ear at the ~~sum-~~  
subclavicular region of the right side  
I detected cavernous respiration and  
pectorilargy. I immediately concluded  
that a small cavity existed at the  
summit of the right lung, upon inquiring  
as to the character of the sputa my

101  
suspicious were confirmed. I immediately  
ordered a small blister and Cod liver  
oil 3i three times daily, and Gentian and  
balaam tea.

March 9<sup>th</sup>

Thinks the treatment doing her  
good. Can take 3p of the oil.

March 11<sup>th</sup>

~~Pulse, not having my watch in order. I could  
not count the pulse. Tongue about the same as  
yesterday.~~

March 16<sup>th</sup>

Had another nervous spell  
and refused to take any medicine  
~~about~~ two or three days ago. Has now  
however resumed her medicine and  
for the last two or three days has been  
much more cheerful. The oil was be-  
ginning to nauseate her, and consequently  
she laid it aside, for a while.

March 19<sup>th</sup>

Much better can walk farther. Looks  
more cheerful converses and laughs with the  
family, this change has been attributed  
to exclusion from the kitchen and hearth  
of the stove. her cough is still harsh and  
resonant sounding as if coming through  
a trap tube. has an enormous ~~appetite~~  
appetite.

May 31<sup>st</sup> My patient has taken a travelling tour  
and come home looking fat and hearty, but  
had yesterday spitting of blood, is taking nothing.

August 2<sup>nd</sup> <sup>27</sup> Dysentery Mr Gray's child Aug 27<sup>th</sup> 1854 Indianapolis  
 Child 2 yrs. has had the dysentery stop several times, but  
 not permanently. I gave it on my first visit the following  
 R Cal grs iiij Warm Mustard bath night and morning. Mist. Greta 3j  
 Jueca grs i R Pul: No. 11 S. one every two hours. R: Kramen 3j  
 Mops: grs 20 R Pul: No. 11 S. one every two hours. R: Opia Camp 3j  
 I gave her 4 more powders at evening to be taken through R: Aqua Mentha 3j  
 the night. Ordered a mush noultrie or red flau. R: Sacch: alb: 3j  
 mel to be placed over the abdomen. R: Mucilage Sacch: 3j  
 S. teaspoonful every 2 hours until the water goes.

August 3<sup>rd</sup> Had one napage at Day break which was more natural  
 had three in the night. Skin natural. ~~no~~ rather too quick  
 I gave her R Linnine grs iiij

Rhei grs i  
 Sod: Bicarb: grs i  
 Cal: grs ii  
 R Pul: No. 11 S. one every two hours.  
 Saw the child in the evening and found it had only 3 napages  
 through the day and only slightly streaked with blood  
 ordered it 3j of castor oil and 3j of Paragonic.

Aug 4<sup>th</sup> Slept better than it has for sometime. more blood,  
 and pain in napping. Ordered R Cal grs iiij R Plumbi & Celas grs  
 ordered also a warm bath and mush Rhei grs iiij R Mops: Sulph: grs 20  
 noultrie and injections every hour Jueca grs i R Pul: No. 11 S. one every 2 hrs.  
 of cold water. and an injection R Pul: No. 4 S. one every 2 hrs.  
 composed R Plumbi & Celas grs x every 3 hrs. I think the child is  
 worse. The Father says it has been sick 4 weeks, it is not gaining.

Aug 5<sup>th</sup> Saw the Father on the street this morning  
 who told him his child was better no napage  
 in the night and the last two more natural  
 one being yellow and the other green.

Aug 6<sup>th</sup> Slept blood. Skin natural <sup>gave</sup> ordered the Cal. grs iiij This seems  
 to do more good than anything else. Rhei grs i  
 Jueca grs i R Pul: No. 11 S. one every 2 hours.  
 in at bed time I gave him Sod: Bicarb: grs i  
 Mops: Sulph: grs 20

Aug 8<sup>th</sup> Found him better this. The last stool more natural. Slept well.  
 did not order any medicine today until I see him at 12 M.

Aug 10<sup>th</sup> No bloody stools. is getting well. The Father told me today he was pretty  
 well except a diarrhea.

Stuheller's Case ~~syphilis~~ Syphilis.

103

Herman Stuheller aged 22 Born in Germany  
Single. Temperate. a skin dresser by trade  
Previous to this disease was a strong and  
healthy man. he is of a light complexion and  
has light hair. On the 1<sup>st</sup> of January he had  
connection with an unclean woman and  
7 days after a bubo and chancre, appeared  
simultaneously. the former being ~~about~~<sup>on</sup>  
at this time on the corona glandis about  
the size of a pin's head. This healed  
over. But the bubo after being poulticed  
for 4 weeks at last supplicated. At  
this time he was admitted into the  
Penn<sup>a</sup> Hospital, The swelling being  
enlarged. Lime water Black wash  
and powdered calomel were suc-  
cessively applied. In a week after the  
appearance of this Bubo another on the  
opposite side made its appearance  
this was lanced but according to his  
account discharged no pus but blood  
this bubo burrowed very much pills  
of calomel were given and he was Oxya-  
lized. No improvement in the sores.  
Lys: Larrea Comp were then given internally  
and the bubo crept with I  
He continued on this treatment for 7 weeks  
He now left the Hospital unrelieved  
and uncured. and was placed under  
Dr. Fendlerling, and afterwards under

under Dr Hartagin whose care he was under for 9-10 weeks.

Herman entered the Almshouse Sept 3<sup>rd</sup> 1860 immediately after being under the care of the last mentioned gentlemen. When he entered the house his groins were much ulcerated and a sinus extended from the right side ~~about~~ <sup>about</sup> an inch and a half which gradually sloughed away and left a large sore. On the opposite side there was another sinus running upwards which was large enough to insert the thumb of common sized hand into.

He has not improved at all since he has been here. Since he has been here Dr. Putt xxgrs to 3j and xxgrs Cup: Tulp: 3j have been alternately used Iodide of Potassa et Ext: Corii with Taraxac decoct. Iodide of Iron Iodide Potassa et Bichloridi Hydrarg: Besides these he has used externally Labanagues sol: Tulp Quinine solution, Grease ~~water~~ water  
Lan 18

has been taking Calomel pills and his mouth is slightly touched. The groins are very tender and <sup>cannot</sup> bear the pressure of the lightest poultices. The left side is now nearly healed over except a an ulcerated surface along side of the scrotum which extends around the perineum and is about

an inch in extent. There is now on the Right side a large phagetic ulcer about two inches long and one inch wide an inch in depth encircling the crest of the ilium. This ulcer has grown very rapidly since its first appearance. The diseased surface of the right side now occupies the whole of the Iliac region of that side. the ulcers vary from a sixpence to two inches in length. separated by cicatrices of old ulcers.

Jan 19 Found a sinus running from the right side across the towards the left side, above the pubis, about three inches in length. ordered a light Baccad and water poultice and the sinus injected with aromatic wine. His mouth is slightly affected by the Calomel.

Jan 20 No change. The large ulcer over the crest of ilium seems larger. Cont the purifications of yesterday.

Jan 21<sup>st</sup> The large ulcer on the crest of ilium seems increasing. Could not bear the poultice on yesterday so great was the pain.

Jan 22 Discovered that the sinus communicated with the penis. running therefore in this direction. The ulcer looking worse especially the large one on the crest of the ilium.

Jan 26

The largest ulcer seems to be increasing. Cont: the last treatment

Jan 25<sup>th</sup>

The ulcer is running down along the crest of the Pubis.

Jan 27<sup>th</sup>

Did not see his groin today, he being asleep.

Jan 28<sup>th</sup>

No change from the 25<sup>th</sup> ult, except in the sinus which is ~~better~~ filling up.

Jan 29

No change perceptible from yesterday

Jan 30

Seems to be some disposition in the sores of the right side to heal. The largest ulcer on the opposite side is no larger than it was yesterday. Ordered as a drink, Marks ext of Sassafras or 3i during the day & a pint of water.

Jan 31<sup>st</sup>

Hardly any change perceptible in the sores.

The treatment in this case is very unsatisfactory.

Left the ward February 1<sup>st</sup> 1851 to take the Women's Medical.

Wh. Nos. Med: 2-8<sup>th</sup>  
Case 1<sup>st</sup>

came into the ward Feb 7<sup>th</sup>  
complaining of pain in her legs and back.  
Pulse 80<sup>th</sup> Tongue of a creamy white and  
moist.

Feb 8<sup>th</sup> (Morn)

Pulse soft and about 90, skin natural  
Tongue moist and of a creamy white. Face slightly  
flushed.

Feb 9<sup>th</sup> (Morn)

Pulse about 90 Tongue cleaner than it was  
yesterday. it is now red at the edges and tips and down  
the middle ~~the~~ creamy white and slightly furred.  
Did not complain of pain today in her legs.

Bowels mov.

Afternoon visit. 5 $\frac{1}{2}$  P.M.

Pulse 100. Complains of pain in the  
stomach. The pulse was soft and only little more  
than of ordinary fulness.

Feb 10<sup>th</sup> Morning visit.

Pulse 85 No headache No pain in Back Tongue  
only slightly furred. Cheeks flushed. Complained last night  
of pain in her stomach ordered a dose of oil and mustard plaster  
bound her ~~stomach~~ this morning with no pain.

Feb 11<sup>th</sup>

Complains of <sup>cramps</sup> in her legs. which I discovered was  
essentially like Rheumatism as she says it shifts  
about from place to place.  
This is a case of Rheumatism which resembled  
a case of continued fever.

June 6<sup>th</sup>

came in today complaining after a long walk in a hot sun, with pain in his bones and head and general languor.

June 7<sup>th</sup>

Pulse rather quick. face rather flushed. Skin feverish still has the pain in his bones not tender over stomach. ordered Brandy Punch 3xvi a day

June 8<sup>th</sup> 9 A.M. Pulse very slow and weak not more than 48 per minute. No red spots. Tongue moist, and of pinkish white colour. ordered Punch 3xvi again today.

News Medical

June 26

has been sick for two or three days with looseness in his bowels. No pain on or pressure over the abdomen. Pulse full and regular. Skin natural. Tongue slightly furred. ordered 10 grs of cal: at once. And the following powder to be given through the day cal: grs XX

Pulv: Doveri 3i  
R: pulv: XX ~~Lead~~ his house.

17<sup>th</sup> Pulse 80 soft and larger. Skin soft, and moist. No decayed measles spots. Tongue slightly browned. Throat still sore. Eyes still inflamed. had a slight fever yesterday afternoon. bowels open. small pimples on

his arms, but I cannot tell what they are as yet.  
wants to get up. Ordered him 3℥ of the Fever  
mixture every hour when he has fever,  
and at other times every 3 hours. Nose bled  
this morning. 12 M. Sitting up. Pulse feeble. Eyes still  
red. No eruption except the aforesaid pimple.

18<sup>th</sup> Throat still sore, found him sitting up. Pulse very  
feeble. Told me I must not call him a sick man.

4 o'clock P.M. found him out. 19<sup>th</sup> In bed. Tongue yellowish.  
Eyes not so red. Had a passage (natural) from pills. Pulse  
small and feeble. Bad taste. Ordered Dover's Powder  
tonight. and one bottle of Citrate of Magnesia.

3 P.M. Sitting down stairs by the stove the day being  
cold. Pulse still weak, and feeble. Tongue cleaner.  
Eyes quite bright. Travels free. No eruption.  
20 well without any eruption.

Remarks

I think the Emetic checked the approaching  
disease. It was just the minute of time to give it.

Mr Hopper Age 26<sup>th</sup> years.

Gr D

Symptoms. Frequent desire to pass urine. Pain in  
renal region. Continue. ordered Uva Ursi 3i and the following  
pills 49: Part of

Calomel	grs iii

111

George Owens June 28<sup>th</sup>

Received a blow from a brick, which caused his eyes to become much ecchymosed and ~~and~~ also cut his eye brow, about an inch in length. Ordered cold water, ~~and changed~~ at my first visit, but changed it to slippery elm in the afternoon. The parts were too tender for searing. His pulse was in the evening full, and strong. Ordered at my first visit

Lalap grs XII  
Cal grs V

as a purge. In the evening there was no operation. Gave him every three hours ~~one of the~~ a powder containing  $\frac{1}{3}$  gr of Cal and 2 grs ~~of the~~ <sup>of the</sup>

July 1<sup>st</sup>

Swelling and Rheum much less, told me I need not come any more. ~~The~~ His bowels were not opened after he had taken in addition to the above

Lalap grs XII  
Cal i grs V  
Rhei grs V

The remarkable feature in this case was the difficulty of getting his bowels opened notwithstanding I gave him a dose that there should be nothing on his stomach at the time. This case strengthens me in the idea that simple measures are the best. Finding the powders had no effect he took a dose of castor oil, which operated.

Typhus Fever. (Lancet Case)

May 1<sup>st</sup> Has been in since the 24<sup>th</sup>. Dismissed. When entered had the ordinary ~~sym~~ premonitory symptoms of Typhus Fever. or Ship Fever. ordered an Emetic. Today Petechiae have appeared on his abdomen. Tongue dry. skin hot and pulse frequent and gaseous. ordered Punch (Brandy) 3xvi Beef Tea 3viii Turpentine mixture. Zj every two hours.

May 3<sup>rd</sup>

Tongue moist. Petechiae increasing in numbers.

5<sup>th</sup> Tongue moist. Other symptoms no worse. Cont. Diet.  
6<sup>th</sup> No marked change.

Indianapolis Feb 4<sup>th</sup> 59

Catarhus Infantilis. Infantorum

Was called this last evening at 8 O'clk to see a little girl 9 mos. old. Fat and healthy looking child, Symptoms Dyspnoea, Skin hot, feverish, Cough with expectoration. Face flushed. Unipen heat over the body, one of the neighbours remarked that she had alternate flushings of heat and natural temperature. Had two free evacuations from some medicine, ~~was taking~~ and had taken an emetic of Hine syrup. I ordered a warm bath, and a mustard plaster to the chest, with directions if the feet became cold, and head hot to soak the feet, in a hot mustard bath. I also prescribed 2 qts of Hine syrup every two hours, and the following powders every three hrs

R. D. P. 5ss  
Rhei Pulv 5ss  
in Mola per.

Feb 4<sup>th</sup> 10 O'clk A.M.

Breathing easier. Skin natural. Discovered that two trisuspides were forcing their way through. Face not so flushed. Had a natural passage last night. Has taken three powders. Slept from 11 O'clk P.M. til 1 A.M. 2 hrs. Cough about

the same. Saw the tongue imperfectly, ~~the~~ whitish fur. Treatment: To take the remaining  
two powders, with about  $\frac{1}{4}$  teaspoonful of cream of tartar dissolved in  $\frac{1}{2}$  pt of  
water as a drink as she was thirsty. Reddened the skin with mustard  
over the breast. Ordered it to be applied again this afternoon, and another  
warm bath to day.  $5\frac{1}{2}$  P.M. Feverish, sleep, bowels unmoved since <sup>morning</sup>

had a warm bath, and a mustard plaster on her breast.  
Prescribed nothing but the bath, and mustard on the breast. I was  
tempted to give small doses of Cal: Rhei & Magnesia, but did  
~~not~~ as she has had only one passage to day, but did not.  
Tomorrow will decide whether I was right. The Mother and Father  
think she is better. Drinking the Cream of Tartar solution which she  
likes. Feb 4<sup>th</sup> Skin more natural. Cough looser. Had two passages one free and  
the other more scanty, I saw the scanty one, and thought <sup>totally</sup>  
good, rather darker than it ought to be. Slept well last night.  
Picking at its nose. ~~her~~ Tongue, whitish with a tint of yellow. Lies  
on belly. Treatment continue the sinapiens over the breast as here-  
tofore. To take one of these powders every two hours

Cal: grss  
Rhei grss  
Magnesia Calc: grss iv  
M. ft. pulv: No iv  
S. one every two hours in milk  
These quantities were not weighed, and  
therefore may be more or less than is set down. 6 P.M. Heard the Mother singing,  
as I came in, and concluded rightly that the child was better. Has  
taken 3 powders no operation. Coughs still, Has been much better to day,  
the Mother says, requested a teaspoonful of Castor oil to be given at 10 or 11  
o'clock to night, if no operation before that time. Feb 4<sup>th</sup> Slept well last night.

Had an operation soon after I left last evening, they did not therefore give  
the oil. No fever. Tongue cleaner. Disposition to play. Treatment <sup>Hive syr: gts iij</sup>  
with a hip bath (warm) and the breast kept red with sinapiens of mustard  
every three hours  
Discovered an aphthous condition below the lower incisors & Discuspidate.

prescribed <sup>Pod: Malbas grs xx</sup>  
<sup>Ag: rectifd</sup> 3 iv to be used as a mouth wash,  
Feb 6<sup>th</sup> <sup>at 7 o'clock</sup> Coughed a good deal last night, disturbed its rest. Skin natural, bowels rather lo-  
ose. Hive-syrup caused it to vomit, stop it and gr  $\frac{1}{2}$  of Rhei every three hours.  
Feething, ~~may~~ may be the cause of the trouble. Feb 11<sup>th</sup> Have not seen her for 5 days  
cough still hangs on, think it is the teeth. Prescribed <sup>Linimentum Ammonia 3 iij</sup>  
<sup>Ag: rectifd</sup> 3 iij  
Feb 18<sup>th</sup> Mother at the street with her baby, multywell. S. use as a liniment, to keep the breast red,

Acute Inflammatory Rheumatism, (Emma Dixon Case)  
July 3<sup>rd</sup>

When I first saw this patient which was the 2<sup>nd</sup> of July about a week ago. I saw that her wrists ~~and~~ and whole hands were much swollen oedematous and very tender, the least pressure causing intense pain. the patient is a young Mother about 25 yrs of age. ordered phosphate of Ammonia the following. Phosphate of Ammonia a gr 5 of Ammonia Phosphas in solution. with 5 grs of Dovers powder 3 times daily. and a Liniment composed of Ol. Olive. ℥i. Canthi. Ol. Capivi ℥c for her wrists and hands.

July 4<sup>th</sup>

Much Better. Wrists very painful and swollen ordered her to rub them with the a solution of camphorated solution of morphia about a gr of the sulphate to and ℥i of Aq. Camph. and to take a teamwound at night.

July 5<sup>th</sup>

Still much pain, in the wrists and now for the first I noticed that her feet and Ankles were much swollen ordered a ½ doz leeches to be applied to each wrist and Ankle. Cont the above treat.

July 7<sup>th</sup>

Much Better. Can now raise her hand up. Cont the above treat.

July 8<sup>th</sup>

Complained of loss of appetite. ordered Quinine. Complaining of much pain in her ankles ordered Hon. poultice.

Feb 9<sup>th</sup>

Found much better. expressed great relief from the poultice to her feet. Bore a good deal of pressure upon her hands this morning.

Feb 10

Swelling the ribs most all gone can use her ribs and hands pretty well. Bore a good deal of pressure this morning. red ~~swelling~~ all gone.

Feb 12<sup>th</sup>

Let up now and nurse her (blk) baby got much better on the 11<sup>th</sup> and has continued so ever since not needing any attention.

~~Aug 12<sup>th</sup> 1854.~~ Continuation of Mr Gray's child's case of dysentery.

End

Aug 12<sup>th</sup> 1854. Mr Gray called on me this morning to tell me his child had several passages of green colour, but no blood in the night. I ordered the warm mustard bath and the following ~~diarrhoea~~ <sup>diarrhoea</sup> mixture. Let that the dysentery has been checked by the following above treatment ~~very quickly~~ <sup>theory</sup>.

Aug 12<sup>th</sup> 1854. Is now passing green watery stools every hour which the diarrhoea mixture did not check. I gave him  $\frac{1}{6}$  of a grain of acetate of lead and  $\frac{1}{10}$  of a grain of morphine every half hour and  $\frac{1}{4}$  of a grain of Quinine and  $\frac{1}{20}$  of a grain of morphine every hour. These powders were given at 8 A.M. and after taking 3 or 4 of the lead powder and 2 of the others the child fell asleep and slept from  $\frac{1}{2}$  hour to an hour. At 12 $\frac{1}{2}$  P.M. it was better not having had but one passage in the course of the morning. Skin natural and tongue clean. No pain, but very feeble and anemic. <sup>Cal. 3ss iij</sup> <sup>Sp. 9ij</sup> <sup>also</sup> <sup>plumbi 3ss 9ij</sup> <sup>also</sup> <sup>4 M. pul. 11</sup> <sup>some after a passage</sup> <sup>and at bed time</sup> <sup>and at bed time</sup>

Aug 13<sup>th</sup> Had 3 stools, ~~in the night~~ <sup>in the night</sup> <sup>thicker and yellow</sup>. Skin rather hot pulse quick and frequent. Repeated the above powders with <sup>albed 9ij</sup> and increased Quinine <sup>3ss</sup> making 2ss in the whole. <sup>Aug 14<sup>th</sup></sup> Skin natural. Stools less frequent more natural still streaked with blood. Did not renew the powders until I should call him the afternoon. I gave 5ss of <sup>ser: powder</sup> last night at bed time.

March 6<sup>th</sup> Maria Johnson's family.

This family consisted of a Mother and three daughters ages Mother 40 eldest daughter 25 second 16 yrs third 9 yrs and youngest 3 yrs. They all came directly from the ship, which brought them from Ireland.

Mother Maria Johnson

March 6<sup>th</sup>

Skin in the morning not hot. Pulse about 100. Diarrhea. Tongue moist with a white fur upon it. No petechia. Not much head ache. ordered chalk mixture

March 7<sup>th</sup> 9 A.M.

Skin about same. Tongue still moist and furred. Pulse 100. no Petechia diarrhea still. Complains of sickness at stomach. According to Nurse's Account was delirious all night ordered Effervescent draughts to be given through the day.

6 P.M.

Pulse 120. Skin not very hot. Tongue as in morning.  
March 8 9 A.M.

All the symptoms about the same. no Petechia was up very often during the night. ordered Chalk mixture and starch injections. has been taking 15 Carb. Ammonia. ordered Neph. mixture with Vin. Grecas through the night. and Vin. op. for stimulus and diarrhea

9<sup>th</sup> 9 A.M. Pulse 120. Skin rather warm but not hot. Tongue exceedingly dry and hard. Complains of Headache and drowsiness. No Petechia. Diarrhea better. ordered Vin. op.

to be continued. Comb. Am<sup>ic</sup> stop & and Terleint. Mixt to be given  
instead. also a wine glassfull of infusion. made of  
Re Serpentaria Rad to be given three times a day.

Coptis Tripartita 203f

Magnesia Sulphur 3i

6 P.M. Tongue completely moist. quite different from what it  
was in the morning. skin almost natural. Ordered next  
mixture to be given during the night.

March 13<sup>th</sup> 9 A.M.

Tongue Moist and almost Natural Color

skin natural. Pulse about 80. Bowels only opened  
once during the night still complains of  
headache. 10 P.M. Tongue still very deep. bad dianhaea

14<sup>th</sup> 9 A.M.

Tongue Moist. The skin natural. Pulse  
not more than 80. little deep. Bowels today  
are better than yesterday. The above tonic was  
stopped 6 A.M. Not much febrile manifestation

15-16-17<sup>th</sup>

On the 15<sup>th</sup> and 16<sup>th</sup> (No dianhaea but today  
has it again. skin natural. Tongue moist

18-19<sup>th</sup>

Tongue very dry. Her husband is also in the  
building and she gets a good deal about him. ordered  
Serpentine mixture.

March 22

Yesterday the right and as far back as  
behind the right ear was attacked with  
erysipelas. Tongue ordered the next Remedy with  
Lead water and wine of Opium. and Quinine and Magnesia. etc.  
Today found the Tongue very dry. ordered Mist Terleint.

Fanny Johnson Age 9 yrs  
March 6<sup>th</sup>

Pulse 120 skin soft and natural in the morning but so very hot with a pulse 160 in the evening. No Petechia. A Diarrhea. Not much head ache, a tolerable amount of strength. Tongue furred white and moist.

March 7<sup>th</sup> morning

Tongue moist on the edges but dry and hot down the middle. No Petechia. the other symptoms of yesterday not perceptibly increased. ordered Cal et S. Pm 6 P.M.

Pulse 160 no Petechia skin not over heated. Diarrhea less. stop Calomel et Dover's Powders  
March 8 P. A. M.

Tongue moist. ~~stop~~ <sup>to give out</sup> skin not so hot as expected. Pulse 120. Put her <sup>to give out</sup> readily and promptly when told. 6 P.M. Not much aggravation of fever. ordered Nuxt mixt with Vin Ipecac through the night. every hour.

March 9<sup>th</sup> P. A. M. Pulse 120. Skin natural. Tongue moist and not so much furred cleaning from the tip which looks red. No Petechia. No Diarrhea. No headache. 6 P.M. Skin a slight degree hotter than natural. ordered Nuxt mixture in the night.

March 13<sup>th</sup> 9. A.M.

Tongue moist and slightly reddened. Pulse about 100 skin feverish. face slightly flushed. 10 P.M. ~~Face~~ Face flushed. Pulse 140.  
14<sup>th</sup> 9. A.M.

Tongue moist and natural (little redder). Pulse 120 skin natural no stupor 6 P.M. No increase in symptoms

Petid.

Childrens Asylum April 7<sup>th</sup> 3<sup>rd</sup> Year in Blockley.  
Case 1<sup>st</sup>

Elizabeth Linnick 6 yrs old has been sick for three weeks when I first saw she was much emaciated and eat nothing. never changed position all day but lay all day with its hands by its side and on its back with its head thrown back on the pillow has been taking the following as a standing prescription. *Lys. Lazzapavilla* 3.

*Pot. Iodidum*

*Osmus Virginiana*

~~The treatment was~~ Wine whey was also given every now and then in small doses. ~~This treatment~~ I changed to the following understanding that its bowels had not been moved for two days I ordered the following powder

Re *Hyd: chl: Mite* grs  
*Pulv Lappa* grs iii

which was to be repeated every third day. also as a standing prescription to keep its bowels regular

Re *Magnesia Calc* 3℥

*Unct Lenna* 3i

*Ol: Cami* gtt ii

*Tacch alba* 3℥

*Liq: Calcis* 3i

Take a teaspoon full 3 times a day

The *Magnesia* and Lime water acting as a purge and also as absorbents of any gases which owing to the very deranged state of the alimentary canal might accumulate. Besides as a Tonic I prescribed I retained the wine whey of the old treatment.

123  
℞ Quinice Sulphas grs

Lacch Alba grs.

℞ ℥i. ℥il viii One every three or four hours.

April 8<sup>th</sup>

Found the child still laying in the usual posture on its back. The powder operated once on still pale and emaciated pulse very quick and feeble. Continued the treatment. Has eaten more today than before. Bowels opened twice.

April 9<sup>th</sup>

Pulse 120 very weak. Still laying on its back with the same dull and listless expression of countenance. Touched its abdomen this morning and it appeared to cause pain. The matter in the eyes collects and forms membranes over the eye. Continued the same treatment. She has been taking besides I forgot to mention a teaspoonfull of cod-liver oil three times a day. ℞ ℥i. Lec. Aselli 3. Cannot bear any part of her body to be touched. ℞ ℥i. Quotidian

10<sup>th</sup>

Found her this morning lying on her side with her head on her arm which I considered an evidence of returning strength. Her bowels not having been opened yesterday I ordered again Cal et Salap as before this being the third day. Pulse very quick and the skin rather hot. Continued the treatment unaltered.

Afternoon visit. The powder not sufficiently purgative ordered an injection of 3℥ ℞i. Quinice which caused a thin watery stool.

11<sup>th</sup>

The oil injection did not operate more than once. Cont treatment.

14<sup>th</sup> Bowels opened every day the matter does not collect about the eyes now very tender can see every bone almost in her body she is getting

April 17<sup>th</sup> Appeared to be not so well. has vomited every thing,  
she eat this morning. According to the nurse account.  
No remarkable differences in the general appearance  
of the child, thinking this might be caused  
by the child considered that it stop if the sickness cont.  
19<sup>th</sup>

Dr. Film collecting around the eyes. Becoming thinner  
every day.

Aqua Ferri 3i f

along with 43 Punch and 3viij Vin Opia. <sup>Geopernutall every 4 hours</sup> to support his strength.

22<sup>nd</sup>

Much better this morning can open the left eye found him yesterday afternoon sitting up in his bed eating ~~bread and butter~~ with a Spoon bread soaked in tea. The left ear discharged a great deal last night. Tongue still dry hot and red at the edges very red at the edges.

23<sup>rd</sup>

Much better to day although his face is much swelled on the left side. The matter is gushing incessantly out of his ear and also from an opening which showed itself for the first time this morning behind the lower portion of the ear. Made the opening larger and ordered the poultice again. No change in the treatment.

24<sup>th</sup> A large Core came from the opening behind the ear.

Looks quite bright this morning tongue red as before  
but much more moist.

23<sup>rd</sup> Great deal discharged the external opening not much  
from the ear. Much better. cont. Treatment.

26<sup>th</sup>

Stop the Antimonial wine mixture. and ordered  
the Quinine sulphur gr XII and Potocarb Ferri gr XII every  
three hours. Face still much swelled on the left  
side. left eye entirely closed. Smells very bad.  
Discovered yesterday the matter running from the  
other ear.

28<sup>th</sup> Much better. Swelling gone down very much.

May 1<sup>st</sup> Great deal discharged from the right ear.

is anxious to sit up and was allowed to do so being  
literally strong.

June 8<sup>th</sup> Has been well and picking in the ward  
Sometime for one or two weeks.

3<sup>rd</sup> June Continuation of the little ear. But Malhotra  
has not improved. He is not so strong as yesterday. He is  
still rather more feverish. There are not so little improvement  
great with every breath of the suppurated pain. Treatment by  
the Antimonial mixture again with the determination not  
to use it again in the case if does not help it. I let the  
Dr. give every three hours, with 20 grs. Hyos. grs. 15  
placed over the breast and a Blower. He is  
up. Two bright red dots of blood before 10 p.m. at 4.  
He is much weaker. Similar to the case of the  
1<sup>st</sup> June. Hyos. 15 grs. have been ordered him. To be given  
June 3<sup>rd</sup> Malhotra still has not improved. He is not so strong as  
yesterday. He is still rather more feverish. There are not so little  
improvement great with every breath of the suppurated pain. Treatment by

Typhus Fever.

April 20<sup>th</sup> Morning 9. A. M. (Marlington's Case)

Pulse 100. Tongue moist but disposed to be dry. Face, the peculiar Typhus expression. Eyes very dull and stupid looking. Abdomen, arms and chest thickly covered with Petechiae. Abdomen slightly tympanitic. Stools according to ~~the~~ the captain account very offensive (this he told without my asking.) Ordered Brandy Punch 3xvi Pepp Tea 3viii  
Difficulty of breathing and cough. Ordered 12 Dy cups  
P. M. Skin very hot and pungent, all the other symptoms as in the morning.

April 22<sup>nd</sup> 9. A. M.

Tongue dryer than yesterday. Pulse 115 (not having a watch I had to guess at this.) Face still has the peculiar expression incident to Typhus Fever. Laying with his eyes half open. Skin not very hot. Covered from head to foot petechiae. Ordered 3j Mist Serubim every hour with 163j Punch and Pepp Tea 3viii.

22<sup>nd</sup>

Petechiae not diminished. Pulse 120. Skin hotter than yesterday at this time. Says he feels colder both tympanitic, Tongue moist. Ordered ~~as yesterday~~ Pepp Tea 3viii  
P. M. Serubim 3c  
Lto Sassafras 3j  
Mucilage Acacia 3j  
Spoonfull 3 times a day

23<sup>rd</sup> Much worse. Tongue dry. Petechiae still covering his body. Laid collecting around the teeth. Some subulth this morning in the hands. Ordered the Turpentine to be given every 2 hours. Brandy Punch 3xvi Pepp Tea 3viii Head to be shaved and)  $\frac{1}{2}$  Doz Cut and)  $\frac{1}{2}$  Dy cups back of his head. And afterward

a Blister.

24<sup>th</sup> Tongue Moist. Sordes still upon the teeth, skin very hot. Throat less. Petechiae becoming rather duller, Pulse 100 or 90. continued yesterday's treatment.

25<sup>th</sup> Tongue still moist but dryer than yesterday. very thick sordes on the upper front teeth. Eyes little bloodshot and half closed. pupil very much contracted. very deaf. The Petechiae are disappearing. Those that remain have a bluish look. Cont. Treatment. Head ~~to be shaved~~ shaved yesterday.

26<sup>th</sup> Found him very sleepy and stupid. eyes half open when he looks at you. Does not answer your questions. cannot protrude his dry and hot tongue. A thick map of sordes covers his teeth. Petechiae almost gone. Cont. Treatment.

27<sup>th</sup> Great change for the better. Tongue moist and easily protruded. Skin quite cool. Sordes still about the teeth. Not so stupid. Pulse regular and rather full. ordered Turpentine mixture every three hours. instead of every 2 hours.

28<sup>th</sup> Not so well this morning. Tongue dry, and protruded with difficulty. Skin hotter. and more stupid. ordered the Turpentine Mixture every 2 hours again.

29<sup>th</sup> Does not talk any. Tongue this morning was protruded comparatively easy. which moist and coated thickly with a white coat. Skin cool. Sordes nearly all gone.

Cont. Treat:

30<sup>th</sup> Tongue moist, and cleaning from the tip. Skin moist and cool. Pulse regular and full. Spoken to me this first time this morning for a week or more. asked to get up. Cont. Treat: ~~Do~~

3

Jos Osborn came in yesterday age 33 says he has  
 been sick one week and never had Rheumatism before,  
 complains of pain in his knee joints and in his arms,  
 had to be carried up stairs into the ward and lifted  
 into his bed. Found him this morning with a full strong  
 and regular pulse, which did not correspond  
 with his face which was pale and also his body.  
 This pulse was therefore inflammatory. I took imme-  
 diately from his arm 163 of blood and ordered  
 Pulv. Mead et Opii grs. i every three hours with 15-grs  
 of wine of Colchicum every three hours (each to be  
 given at an hour's interval).

29<sup>th</sup> Left yesterday for home much better could move his legs as he pleased before he left.

The weather was very warm, the sun was shining, and the wind was light. The water was very calm, and the sky was very blue. The birds were very noisy, and the fish were very active. The weather was very pleasant, and the day was very nice.

June 26<sup>th</sup> W<sup>m</sup> H. Wanaah's Case (Teething probably)  
W<sup>m</sup> is 6 months old. The hottest day of the season Therm: 84° at 3 P.M.  
His bowels for two or three days have been irregular as to  
their action sometimes not moving for two days. This morning  
they were moved 3 times and in the afternoon and evening  
and during the night 12 times. They gradually became  
thinner, until towards the last almost ran from  
him as thin as water, and almost colourless, accompanied  
with much pain, causing the little fellow to twist  
and cry piteously. High Fever set in about 4 P.M.  
I had to walk the floor with him during the night.  
His stools for two or three days have been light coloured  
indicating I thought deficiency of Bile. About 2 P.M.  
I gave him about gr  $\frac{1}{2}$  of Calomel on the end of my finger  
and about 10 O'clk P.M. gave him about 45 gts of Paregoric.  
He ~~stayed~~ ~~partly~~ ~~asleep~~ He fell asleep at 1.15 A.M.  
and slept until 4 O'clk A.M. His skin at 4 A.M. was hot  
June 27<sup>th</sup>

Awoke at 4 A.M. with a hot and dry skin, but  
appears much brighter laughs and plays. Operations  
much less painful and towards evening became much  
better. Fed him to day on Gum Arabic water and boiled  
milk with cinnamon and cloves boiled in it, all of  
which he took with relish. The Gum Arabic ~~water~~ he liked  
better when the Fever was on him. Have heretofore been  
mixing Baker's bread dried and rolled into powder (coarse)  
Thinking there might be some ingredient in this bread which caused  
his diarrhea. I stop mixing it in his milk. Slept sweetly all day  
nearly  
June 28<sup>th</sup>

Slept sweetly during the night. No operation during the  
night. Skin natural. Had a good operation about 8 O'clk A.M.  
Going to mix dried boiled flour in the milk instead of Baker's bread.  
(Continued)

A very interesting case.

Description of a Case that occurred at Blockley Hospital June 24 1857. Caused by eating cherries as was supposed by the patient. Patient an intelligent man,

June 23

Mich Henley aged 69 very diminutive in stature. eat some cherries this morning which caused his bowels to become very loose sent for me about 6 o'clock found him on the stool but did not see the discharge. Pulse very small. which I was ~~rather~~ supposed was his natural pulse as he walked from his room down a flight of stairs pretty steadily to me and stood pretty firm on his feet. I sent him immediately to the Medical Ward where he was not seen by a physician, ~~for~~ until an hour 8 1/2 o'clock at which time he was passing "imperceptibly" to use his own words, the characteristic rice water discharge of cholera. Also vomiting the same. Pulse very small and attenuated and feeble. beating about 60 according to doctor Shively. A minute he was ordered a ~~grain~~ half a grain of morphia in a teaspoonful of Agg. Camp. and an hour afterwards 1/2 grain of calomel. after taking this he vomited very freely this rice water discharge. so that they supposed he had vomited it up. consequently gave him 20 grs of the following mixture. Chloroform 3i and added hot Peppermint to his

3i of Agg. Camp 3ii legs and feet ~~to his stomach~~

I saw the second time about 10 o'clock when he was at which time he was laying in a sickly kind

with his head leaning over the side of the bed seemingly unconscious of any thing around and calling for help he was very restless tossing about from one side of the bed to the other. And crying out with cramp in his legs. Tongue very cold. constant Thirst, asking incessantly for water. Skin on the back of the hand to be clammy and over his body clammy and cold when pinched up into plects. remains so for some time without relapsing into its natural condition. complains of being very hot inside. ~~breath has become more husky and dry within the last one or two hours.~~ I gave him a teaspoon full of the Chloroform (mixture before mentioned) at 10½ O'clk. still very restless Tongue and all the other symptoms about the same except the cramps in the legs which are not so severe.

Paped about a Tablespoonful of rice water discharge from his rectum. I now ordered a strong Mustard sinapism to be applied directly to his the whole length of his spine, (the Mustard in direct contact with the skin) ~~also~~ the same to the calves of his legs and his wrists. Ordered a grain of Calomel to be given every fifteen minutes. And ~~and~~ an injection of starch and Laudanum every hour the first injection to contain ℥i of Tr. Opii to 3viij of starch Mucilage. the second 60 grs to 3viij and the third without Laudanum.

11½ Seems disposed to sleep. Still restless and thirsty has ~~not~~ had ~~but~~ one inclination to stool since 10½ O'clk. The cramps appear to have ceased. Tongue still cold. Skin warmer.

# Rheumatism.

Phosphate of Iron <sup>137</sup>

Case 1<sup>st</sup> (Colfax)

Nov 12<sup>th</sup> Ann Master. aged 50 has had Rheumatism 3 years. was at the time of her admission not able to walk without crutches, and cried out with pain on being touched  
Dec 12<sup>th</sup>

Can bear pressure upon her limbs and can walk about with the aid ~~of~~ a little stick. In this case the Dover's powder was given along with the Ammonia.

Jan 20<sup>th</sup>

Still ~~relieved~~ in the ward. much relieved but not well.

Cold sweat on his forehead. Kept the Mustard on an hour. We now left him with orders for him to have a gr of Calomel every 15 minutes and starch injections every hour until he went to sleep. His pulse has come up. the Tibial artery and the Malesus can be felt beating very distinctly.

June 24<sup>th</sup>

Found him very much refreshed, from a good sleep. Having fell asleep soon after we left <sup>him</sup> and continued until morning, and thanking us for having saved his life. Skin natural Tongue however still cold. and still thirsty ordered warm tea for him to drink. and the Calomel powder through the day every fifteen minutes.

2 o'clock P.M. Tongue still cold. but he is evidently better ordered Cal grs every hour.

Case 2<sup>nd</sup>

aged 18 came in  
with Rheumatism of the shoulder and  
lower extremities.

Dec 12<sup>th</sup>

Has completely recovered  
and walks about the ward with-  
out any trouble.

Case 3<sup>rd</sup>

... Aged 76. Coloured. came in Dec 11<sup>th</sup>

Dec 21<sup>st</sup>

Has been gradually improving  
since he came in.

Jan 13<sup>th</sup>

Discharged about a week ago greatly  
relieved

Case 4<sup>th</sup>

Elijah Miller, Colored, age 72 was  
admitted Dec 21

Says he has had Rheumatism for 9 yrs. was in  
bed one year.

Jan 17<sup>th</sup>

Complained of pain this morning in the

leg

Jan 19<sup>th</sup>

Walks much better than he did,  
took yesterday 10 grs of Dox. Powder 3 times separated  
which caused to sweat a great deal.

Jan 20<sup>th</sup>

139  
Did not see him today but heard no complaints.

Jan 21<sup>st</sup>

Complains only of pain in the elbow and knee. gave him Lin. Ammonia.

Jan 22<sup>nd</sup>

Pain in the ~~shoulder~~ elbow and left leg nearly gone.

Jan 24

Still has pain in the left leg.

Jan 27

Did not see him today.

Jan 28

Great deal better although the day is damp and raining.

---

Continuation of Hurley's Case.

June 25<sup>th</sup>

Found his pulse full regular and soft. Skin and Tongue natural. Complains of not having any appetite. has not had a stool since yesterday morning. ordered *Mag. Hydraz.* grv to slightly relax his bowels.

July

This patient entirely recovered and was operated for Peritonitis by Dr. Page. some six months afterwards.

Major Frisby's Case. Blk.

Jan 21<sup>st</sup>

Came in complaining of pains all over his  
body put him on  $\mathcal{R}$  Ammonia Phosphatis 3i  
Aqua 3vi  
9 Tablets contul 3 times daily

Jan 24

Says he is better. This is a fine day  
however, and it may be on account of the  
weather and not the medicine.

Jan 27<sup>th</sup>

Complains of a little pain to day)

Jan 28

No pain. Complains to day of a cough.  
The day is wet, and cold.

Lib. Nos: Med:

Case 1<sup>st</sup> Emma Dixon's Case, Acute articular Rheum  
Phosp. Amm. et Pulv. Piloc. et orini. Case in the front among  
the nos: medical cases, in another part of this book

Case. George Pop age 50 Blk

April 23<sup>rd</sup> Has had Rheumatism for 7 yrs. An extraordinary  
large man. weighs about 250. has been often relieved  
by the ordinary remedies. Complains this morning  
pains in his legs can not get out of bed. ordered 10 grs  
of Phosphate of Amm. with 5 grs Dox. Ind. three times a day.

April 24<sup>th</sup> Better.

" 25<sup>th</sup> Still getting better.

" 26<sup>th</sup> better, but tender over the ~~the~~ hips.

28<sup>th</sup> Sitting up and looking pretty well.  
May 1<sup>st</sup> Complains of pain this morning in the old place  
in the hip.

In 80185-4

Was lined.

Throckway, Isaac.

[illegible]

John Sharples. 9 yrs standing. (wh<sup>l</sup>) Age 49  
April 23<sup>rd</sup>

Has been taking phosphate of Am<sup>l</sup> 2 lbs his  
pain is in the muscles of his limbs. when he first came in  
2 weeks ago had to be carried up stairs. Now runs about  
ward when he chooses.

April 24<sup>th</sup> Still continuing better.

Inds

1853

M<sup>r</sup> Allen's Case Age 64 (about) Anxious face. hard to understand.  
Came to my office about 6 weeks ago complaining of  
a diarrhea which he says he has had for a  
year. ordered him injections, for what accor-  
ding to his description I thought piles, of  
cold water. And 15 gts of Lys: Ferri Britic: 3  
times daily an hour before each meal. Saw  
him 3 weeks after this, better complained  
of Acidity ordered Chalk. Saw again  
today a month after the last visit  
found him costive. No acidity. Chalk  
having removed it. According to his own  
request prescribed Argenti Nitras gr<sup>j</sup>  
one pil ~~every~~ and how Pulv: Op<sup>i</sup> gr<sup>ij</sup>  
after meals. also to use Acacia gr<sup>iv</sup>  
the following as an injection. ~~Aceti~~ Pil: clab<sup>ij</sup>  
tion as the cold water injections before ordered did  
relieve his piles or ulcers as he calls them  
having as he says a yellow discharge  
from them.

Aceti Plumbi gr<sup>ssij</sup>

John Kennedy. Art. Rheumatism. April 18<sup>th</sup> Hosp. Am<sup>ica</sup> <sup>143</sup>

A Case of Marasmus Aug<sup>st</sup> 9<sup>th</sup> 1853 Indianapolis.  
Aged 1 year was first attack with cholera In-  
fantum which was in all probability  
brought on by premature weaning, and feed-  
ing upon Arrow root, and Mutton broth.  
The cholera was apparently checked, but  
owing probably to some irregularity in  
the diet, a diarrhoea set in, which  
could only be checked temporarily, and  
continued up to the above date. When I  
first saw the child. The most striking  
and characteristic symptom was the  
senile appearance of the face, when  
the child cried; together with extreme  
in<sup>m</sup>aciation. Two lower incisors were  
through.

This case has undergone a mercurialism, and  
Dr Woodburn ~~is~~ is now stimulating with  
Port wine, and nourishing with Mutton  
Broth.

Query. Was the Marasmus, caused by the cholera  
Infantum. or improper food.

Thacker Case.

October 18<sup>th</sup> 3 Case of Contusion in a child 5 yrs old. Ahead? Case (child) and  
This child was found by me, with its heel much  
contused, and lacerated by a heavy bench which  
had fallen upon it. There was a cut extend-  
ing around the lower portion of the heel, and  
a small round mass of muscle had been forced  
through the skin. Thinking this had better  
slough off. I applied Flaxseed poultices.  
Oct. 25<sup>th</sup> Stopped poulticing and using Turners cerate.

There is now a healthy ulcer, with area  
of a half inch. ~~cut away~~ all the slough gone.  
Oct. 27: 1<sup>st</sup> Continuing Turners Cerate and the ulcer  
is ~~covered~~ bathed in laudable pus and healing  
Cicatrizing around the edges rapidly. Quicken  
granulation by Lunar Cautic.

Nov: 3<sup>rd</sup> Granulations had to be continued, continue the  
Turners Cerate & Opium. General health from the be-  
ginning <sup>very</sup> good. Throughout this case great attention has  
be paid to keeping the elevated at an angle of 20°  
N.B. This case was satisfactory. The wound healed nicely  
and I got paid \$10 as soon as I dismissed the case.

Hooper Case  
foot swelled, abt. 4. enlarged. The stool improved also in appear-  
ance. Health worse. Reduced its nourishment and other things. It  
was not fit for taking. Aug. 25<sup>th</sup> died sometime in the afternoon.  
The symptoms which seemed prognostic of an unfavorable were, continued  
excitation in spite of the high pitched. Life from 2 at 10, and then as  
of the system deposits in the m. t. 10 + increased of an increasing debility.  
The H. of the foot. Venous stagnation also manifested the phlebotomy, but  
not about 10.

Cholera Morbus.

Nov

145

Nov: 4<sup>th</sup> I was called to this case this morning found the child lying in the cradle with pale and with dark areola around its eyes. Its mother said it had been vomiting and purging for the last 2 days, which had a sour smell. The vomited matter looked like curdled milk and that passed from the bowels very yellow and tinged with greenish line. Gave Mustard to its stomach 5' as the child was only 8 mos old and one drop of Laudanum to be repeated in three hours if the vomiting did not cease, also a warm bath. Left Cal gr. ~~to be made into~~ 12 powders

Dov: Powd: gr. one every three hours  
Lod: Picat gr. iij

Nov: 5<sup>th</sup> Vomiting and purging ceased, its mother said it had fever in the night. Backs well. Eyes bright, and plays with the children. Has a bad cough. Stooly & faded. Has taken 5 powders. Ordered the remaining powders and another bath. Has had one stool.

Winning me care  
A very obstinate case of incontinence of urine.  
April 20<sup>th</sup> April 20<sup>th</sup> 1846. Blockley Hospital.

This patient came under my care about the latter part of last month. He was then dribbling his urine incontinently and very irritably. His trousers being continually wet and sometimes marking his way along the floor when he walked. He says he has had this constant dribbling for two years without and hours intermission. He is very weak in consequence. Before he came under my care he had been taking the Dr. Ferri Murialis 15 drops three times daily and being very anemic. And Junc. Cantharides. His ~~past~~ treatment was persisted in for a long time (2 Mos) without affording him the least relief according to his account. I changed his ~~to~~ <sup>to</sup> Ferri for ~~April 21<sup>st</sup>~~ & Quinia sulphas gr XII and also after an hour interval Ferri Protocarb 3℥ the gr  $\frac{1}{24}$  of Styrchnia ~~at 11<sup>th</sup> Jul XII~~ <sup>Quina</sup> ~~to~~ Quatuor horae

April 21<sup>st</sup>

Last night did not nap any scarcely. There is now no wet patch ~~about~~ <sup>on</sup> his in his trousers over his privates

April 22<sup>nd</sup>

Complains this morning as he has ever since he took the Styrchnia of Nibbner and inability to stand on his legs. Says he napped a good deal from his bladder last night by dribbling. It seems to relapse backward as he gets better and ~~appears~~ <sup>shows</sup> a disposition to be periodical. He urine the other day did ~~not~~ <sup>not</sup> affect Litmus ~~at all~~ <sup>at all</sup> very slightly reddened very slightly not near so much as my own did

on that of the Apothecary (Mr Marks) bottle of is being  
that day in good health.

23<sup>rd</sup> Says he passed scarcely any last night. His trousers about  
his privates now keep dry.

24<sup>th</sup> Did not pass any urine last night scarcely. cont.  
Break.

25<sup>th</sup> Did not pass any urine last night. Can walk better.

26<sup>th</sup> Says he passed a little last night. But not enough  
for the nurse to notice when he change his  
bed clothes in the morning. Keeps his trousers dry  
and seems to be in better spirits. Continued treat-  
ment.

27<sup>th</sup> Passes a good deal last night

28<sup>th</sup> Says he passed a good deal last night. Compared  
to what he has done within the last two weeks.

29<sup>th</sup> Passes a good deal last night. The patient very stupid  
in it a blo. will not answer questions put to him  
(don't seem care whether he gets well or not.)

30<sup>th</sup> Passes scarcely any last night. Say "it comes by  
spells" to use his own words.

May 1<sup>st</sup>  
Discovered to day, that he has not taken strychnia  
for a week or eight days. nor any medicine for  
a few or three days. ordered all medicine to be stopd.

May 2<sup>nd</sup> Did not pass any last night scarcely.

*Syphilis Rupia*

Sam<sup>l</sup> Williams came July 7<sup>th</sup> 1857 with his face, body, arms and legs covered over with sores and scabs some of which were the size of an American quarter of a peculiar dark colour. And when pressed upon with the finger there appeared to be from the elasticity of the scab filled underneath with fluid. Some of them stand out from the surface of the skin, the top of an inch ~~in~~ some of the sores where the scab has been removed presents a raw chancery surface. To these are applied the Red Precipitate oint.

And the patient is taking the following

Pot: Iodidum ℥i	} Secord Lar & ℥i; ℥vi per diem
Hydrag: Bichloridi grs	
Aether ℥viii	

Tablets small 3 times a day

July 15<sup>th</sup> The scabs upon his face after having filled up (as it were,) are beginning to fall off and leave sores covered with a thick yellow pus. to which I apply the Red precipitate oint. he complains of no pain any where, has a good appetite.

July 17<sup>th</sup> Nearly all the scabs have fallen off and he says he is a great deal better

Phthisis.

Cases in which the Phosphate of lime have been used

Nov 17<sup>th</sup>

E. Whitehead age 26. Anemic. Large frame, Oyster shell eye. Adungue fingers. Blue line around the gums. Legs very oedematous. Has had right sweat. cavernous respiration in the upper part of both lungs.

Nov 19<sup>th</sup>

Symptoms and feelings of the patient the same put her upon Phosphate of lime, a remedy now coming into use. 50 grs 3 times a day.

Nov 20<sup>th</sup>

Says she is better. Still on the Lime.

Nov 24

Much weaker. continued the Lime.

Nov 26

hectic flush more intense. pulse fuller and stronger. did not examine her chest today.

Nov 28<sup>th</sup>

Countenance more healthy. Skin natural perhaps a little colder than natural. Pulse soft and feeble & same. sounds heard in the chest as at first (Says she is better. Continued the powder.) is much stronger. Raised her <sup>self</sup> to sitting posture with less effort than yesterday.

Nov-Dec 5<sup>th</sup>

Countenance the same. Not much stronger yet. very much oedematous. Yesterday there was distinct cavernous respiration on the left side

151.

Did not sleep much last night but declare herself much better today looks rather more cheerful. her urine is very dark of a rusty brown colour and very opaque and thick.

No change in the patient to day.  
Dr. Little M.D.

Case 3<sup>rd</sup> ~~Lucy~~ Ellen Groves Age 45-

Nov 20<sup>th</sup> The symptoms in this patient indicating  
Phthisis are the eye, night sweats, swelling  
feet, <sup>(oedema)</sup> and a cavernous respiration at  
the upper part of the left lung

Dec 5<sup>th</sup>

Has been using the Phosphate of lime for  
two weeks, without much benefit. Complains  
this morning of sick stomach and diarrhea  
with griping. (this diarrhea I have cause to  
think is caused by the Phosphate of lime, it  
being ~~an~~ insoluble in water. May also be in  
the juices of the stomach. and therefore act  
as an irritant to the stomach, causing  
sickness, or to the bowels, causing diarrhea)

Dec 6<sup>th</sup>

Signs indicating a cavity on the left side. loud crepitation  
over the left axilla. Diarrhea less; Renewed the  
powders.

Diabetes Mellitus. Henry Lynch.  
Has had the disease two years entered the  
wards Feb'y 19<sup>th</sup> At this when the following  
appearances were noticed. Temperament  
a mixture of the bilious and phlegmatic  
Large frame. Broad face and features large  
Face pale, Muscles flabby. The first complaint  
was that of excessive thirst and incessant  
voiding of urine. I desired him to pass some  
into a bottle which he did without the  
least effort about 3vi of clear white urine  
which upon being shaken up a thick white

foam, collected upon the top, which re-  
mained some time, the foam resembled  
Apples or new mown hay, or limes. Sugar  
in great quantity was detected by three  
different tests. Before he came <sup>in</sup> said he vomited blood  
July 21<sup>st</sup>

Complains of pain in his breast and  
small of the back. Said every thing tasted  
sweet, gave him some very sour vinegar  
which he said tasted sweetish, which seem  
to like, said he "could take any thing like  
drink no matter how bitter it was," these are  
his very words, Ordered his drink to be made  
one third vinegar. Plenty of meat which <sup>he</sup> craved  
a wine glassfull of an infusion of Colic and  
Gentian in which 15 gtt of Tinct: Ferri  
Muriatis was mixed and given 3 times  
a day. 10 grs of Dover's powder at night.  
passed about 2 gallons last night.  
July 22<sup>nd</sup>

No sleep. vomited blood, complains of  
nausea after eating passed usual quantity  
of water last night. The Dover's powder was not  
given last night. Same treatment as above to be  
continued.

23<sup>rd</sup>  
Took Dover's powder but did not sleep much  
better. passed usual quantity last <sup>night</sup> which  
the nurse said had spots not as  
thick as before. Took some salt and water  
to check hæmatemesis. wants his meat soft  
cooked. Cont. the above treatment.

Feb 24<sup>th</sup>

No change still complains of burning heat in the left side. cont: Treatment.

25<sup>th</sup>

Better. Did not nap so much water. did not complain of the burning in his side slept better last night

26

Slept well last night, but complaining a severe burning at the cardiac region could not detect anything abnormal there ordered a blister for the pain. As he said it always did him good. cont: Treatment.

March 13<sup>th</sup>

Up to this time the patient has been alternately better and worse. often complaining of dizziness vertigo and burning at the cardiac region. about the first of March the Quassia was substituted for Indian resin of treatment same. The treatment is now entirely changed

Liq: Asenicalis 3ii except the sor pondera a  
Ammonia Hydrosulphas grs xx Night

Powd: Hyoscyamus

Sp: Lavandula 6 a a 3j

Infus Diosma 3viij

Tellernomph 3 times a day

March 13<sup>th</sup>

Complains of weakness in Small of Back wind upon his stomach which he says takes away his sleep. Quantity of urine still keeping naps now about half the quantity he did at

first the patient is still kept upon the<sup>15</sup>  
old treatment: Laurya & Dovers powder, &  
the new medicine not obtainable  
besides the medicine he is kept as strict-  
ly as possible on meat diet, still pours  
down him immense quantity of water  
drinking sometimes seven quarts in 24 hrs  
March 14

Complains this morning of pain in region  
of the kidneys, which would not allow me to  
sleep upon this part ordered 6 cat cups  
continued the treatment

March 20

Does pass as much urine, spat up blood 3 1/2  
last night

March 30<sup>th</sup>

Cannot keep bread from him but  
notwithstanding much better.

~~Di.~~ Gonorrhoea, Indo

Jan 10<sup>th</sup>

1854

Penis very much swelled, especially the ~~Corona~~  
Glandis. Meatus urinarius extra ordinarily large.  
~~Balanitis~~ A large prominence below the Corona Glandis  
on the posterior portion of the Penis.

Treatment

Cold water injections, 2<sup>nd</sup> daily ~~and~~ succeeded  
by <sup>an</sup> injection of Nitrate of Silver 5 grs to the 3;  
Jan 12<sup>th</sup>

Had Chordee last night, which would awaken  
him out of a sound sleep, ~~when seized~~.

Jan 13<sup>th</sup> This much sleepless. took the no running  
 lip burning. before using. Took 3 pills of the following.  
 Last night on retiring and had no Chorde. but was <sup>Lupuline</sup> <sup>Camp:</sup> <sup>20 grs</sup>  
 kept awake, through mental anxiety <sup>Opis</sup> <sup>24 grs. pil. viii</sup>  
 being a poor man and out of work. His right eye is much  
 inflamed, this morning, an old complaint.  
 Treat: Applied the solution to the eye and ordered 3' of salt  
 in the morning and borders of Cal: <sup>grs. ii</sup> in home before  
 each meal. Low diet. (strictly) <sup>Dr. Gaston's</sup> <sup>vi</sup> <sup>iii</sup>

Mrs. Manns Case (Colored woman) Indd 1858  
 I found this woman ~~see~~ through Dr. Gaston's  
 information, in a miserable hovel  
 over the canal. They were too poor to buy  
 candles. I found her lying upon the  
 bed in a dark corner. Groaning as if  
 in labor. Dr. Gaston having told me, she  
 was about to have an abortion, I was  
 led astray, and when I heard her  
 groans. I told her, she need not try  
 to deceive me. for I knew she was in  
 labor. she assented to this. The next  
 day I discovered my mistake, and  
 altered my course. I found that in-  
 stead of having an abortion she  
 had Dropsy. This fact was discov-  
 ered first by an old Indian doctor (Colored)  
 and he out doctored me because  
 I relied upon another's judgement  
 and not my own. I then, having found  
 her bowels not opened, ordered her a  
 purge of Cal: Rhei: and Jalap: ~~very~~ large doses

~~March 10<sup>th</sup>~~ her pulse was 120. Skin beneath.  
Tongue whitish and furred slightly ~~on~~ pain  
in the left side, and right thigh.

March 10<sup>th</sup>

Took besides what I gave her a  
dose of castor oil, and when ~~Mass~~ saw her  
found her passing thin watery stools.  
Pulse 120. Tongue whitish and furred. I left her  
yesterday some cal: and Dover's powder  
and this morning found she had taken  
all except one. Did not order any  
medicine to day.

4 P.M.

Finding she had griping pains at stool I  
ordered her <sup>cal: gr.ij.</sup> <sup>Dov: powd gr. xii</sup> one to be taken every  
three hours <sup>Morphia gr.</sup> <sup>M. Pulv: xii</sup>

March 11<sup>th</sup>

Pulse quick and frequent. Tongue as yester-  
day; has had no passage since bed time  
last night. Complained of ringing in the head  
and "crazy feelings" last night. Which I attribute  
to the morphia and Dov: powd: together. Sweat  
last night. The only symptom I dislike, is the pulse  
which is too frequent, and quick. Stopped the powder  
is taking no medicine now.

2 1/2 O'clk Pulse softer says she is better.

March 13<sup>th</sup>

Pulse hard and quick, 100. Tongue as yesterday  
white and furred. Complains shortness of breath. Slept toler-  
ably. Stopped the powders for fear of salivation.

March 14<sup>th</sup>

Pulse softer and more regular. Had shortness of breath in

the night. bowels inclined to be costive. Hearing  
the dyspnoea indicated water in the chest I  
ordered her Cal: and Morphia. Cal: grij.  
one every three hours. <sup>Morph: gr.  $\frac{1}{4}$</sup>   
At 11: pil: No 8

March 15<sup>th</sup>

Pulse 110 hard ~~and~~ full and quick.  
Slept well. ~~Lip~~ dyspnoea. Bowels free took 3p of  
oil.

March 16<sup>th</sup>

Pulse softer and less frequent about 80  
or 90 per minute. Bowels regular. Tongue cleaner  
ordered for her Juniper berry tea and cream of  
tartar. and nothing else.

March 17<sup>th</sup>

Pulse 80. skin natural. Face brighten. Bowels  
regular. Complained of a gristle rising in her  
throat, when she has these weak spells.  
continued the tea.

March 18<sup>th</sup>

Pulse more regular, and softer. Tongue whitish.  
Skin natural. Slept well. Bowels regular. Urine  
~~deposits~~ onake and deposits a whitish  
precipitate, which was dissipated by a slight  
heat. ordered the tea continued and added  
a tonic tea. Gent: & Columbo

March 21<sup>st</sup>

<sup>soft & full</sup>  
Pulse 100. Skin moist. Bowels regular  
Tongue much cleaner. Good appetite.  
strong enough to sit up a little while by  
the fire in a chair. cont: the treatment

March 23<sup>rd</sup>

Pulse quick and strong. Tongue clean

Bowel regular. tells me the tea prevents her fainting.  
 spells. Only taking the <sup>True</sup> Tea at present.  
 April 7<sup>th</sup>

Has been since the last date getting alternate-  
 ly better and worse, being attacked with Dyspnoea  
 at times so bad as to prevent her lying down.  
 Has not been taking medicine regularly,  
~~Cal: & Sweet Wood: seem the best thing for~~  
~~her~~ found her this morning not able  
 to lie down and her breathing very short.

Gave her Elatin gr  
 Cal: gr viii Aft. pil: viii  
 Jalap: gr XX

*[Faint, mostly illegible handwriting at the bottom of the page, possibly a continuation of the medical notes or a separate entry.]*

Cod's Liver Oil (Ol. Rubrum) in Phtisis Rheum &c  
Case 1<sup>st</sup> Mary <sup>Mooney</sup> ~~Mooney~~ Case. 165  
Feb 6<sup>th</sup> 1857.

Had been in the ward some time, very thin  
Pulse small and hard and about 100. Spittle comes up  
in small flakes with a mixture of frothy expectora-  
tion. ~~Over~~ Flat on both sides when percussed. Sound  
at the summit of the Right Lung as if there was a  
cavity as large as a dollar or larger. ordered  
Cod's liver oil 3℥ three times daily.

Feb 7<sup>th</sup>

No change in the above symptoms. Cod's liver oil  
made her sick. Stopt it.

Feb 8<sup>th</sup> 9<sup>th</sup>

~~Spittle does not come up in flakes as much.~~

On examining her spit cup did not see the little flakes  
that I have seen heretofore but a mass of frothy white ex-  
pectoration like that of Beer. ordered her a 3i of Cod's liver  
oil in a wineglassfull of Porter 3 times daily. She says the same

Feb 10<sup>th</sup> Morning

Found this morning again complaining of cramps, other  
symptoms the same as yesterday. The oil nauseates her  
Afternoon. Did not throw up the oil today ordered 3℥ in wineglass of Porter

Feb 11<sup>th</sup>

Made very sick (I believe by the oil.)

Continuation of Wm. H. Dana's Case.

June 29<sup>th</sup> Is now sleeping sweetly in his cradle having fallen asleep without any coaxing. Drowsy all day and petfull. 4 stools two last greenish and greenish white lumps.

June 30<sup>th</sup>

4 operations first greenish mucous, last three more natural being yellowish. No Fever. Boy's more than usual. Drowsy. No medicine to day. Has had more exercise in the fresh air, riding in his little wagon.

~~June~~ July 1<sup>st</sup>

4 operations about the same as yesterday with the exception of greenish mucous stools. Appears well except being too thin and too frequent stools. No sign of teeth yet.

July 2<sup>nd</sup> 4 operations, Still thin and mixed with mucous, yellowish. Very thin as to his body. Not so petful today. Good appetite. Slept better than usual last night. No teeth yet.

July 3<sup>rd</sup> 5 operations Mucous, and thinish. In good spirits all day. Sleeps as well as usual. No teeth as yet.

July 4<sup>th</sup> 5 operations. Have been feeding him a watery solution of Arrow-root as we could <sup>not</sup> get milk. Took him riding morning and evening. In good spirits <sup>has not</sup> pulled and bit at things so eagerly. No teeth.

July 5<sup>th</sup> 3 operations. Feeding him now on boiled Arrow and milk. Still thin otherwise well ~~but~~ Had two good rides morning and evening in his little wagon, which seems to do him a great deal of good. No teeth nor perceptible prominence of the gums.

July 6<sup>th</sup> 4 operations. Rode in his wagon in the afternoon. Good appetite. Sleeps well, and appears in good spirits. No teeth nor swelling of the gums. Passes water more than usual.

July 7<sup>th</sup> 4 operations thicker than yesterday. Thin and pale.

Case 2<sup>nd</sup> Mary Burns.

July 6<sup>th</sup>

very thin. Pulse small quick and hard about 65 - 70 gas  
ordered 3℥ of cods liver oil 3 times daily. Flat upon her upper  
head a sound resembling air rushing into a cavity, at the  
summit of the left lung.

July 7<sup>th</sup> 18<sup>th</sup>

No change stop the oil as she became very sick

July 8<sup>th</sup>

She says she is getting better. ordered 3℥ of licorice pills in

3℥ of Poter 3 times daily

July 10<sup>th</sup>

Oil sickened her, and caused her to vomit the last dose  
(3<sup>rd</sup>) up. ordered 3℥ three times daily, in Poter. Day she is better <sup>and vomits</sup> enough

July 18<sup>th</sup>

Examined her chest today, found the same symptoms  
of cavity, that were first noticed. Continuing the Cods  
liver oil as heretofore.

July 23<sup>rd</sup>

Baby 5 days old. Indis

Was spending the day at M<sup>r</sup> Hamill's in the country  
when M<sup>r</sup> Keely requested me to see his babe. 5 days  
which he said was dying. Found a puny baby, which  
would weigh I suppose 5 lbs lying with closed eyes  
perfectly motionless. Bowels very loose, running al-  
most incessantly. The Father had given it a dose of cor-  
dial which I suppose ~~was~~ was the cause of the stupor.  
Had its feet bathed or rather soaked in a rather warm  
water, and had its spine and lower extremities rubbed  
with flannel. This appeared to revive it, for a short time. Ordered  
15 drops a solution of Borax, A piece as large as a Beech nut  
dissolved in 3℥ of water. I ought to have said Mother's milk 3℥.

Called next day and found the child better without any medicine

## Matthews Case

April 14<sup>th</sup> 1857

Flat on both sides. on the left. Cavernous respiration. a man of very large frame, has been taking a 3℥ of cod liver oil three times daily for 6 wks.

14<sup>th</sup>

Not so flat: when he speaks the chest ~~sounds~~ resonates. Expectoration. Bloody and watery. Dulness of sound over the heart. Can hear respiration very distinctly over the cardiac region. caused him to walk up and down the ward about 5 minutes as fast as he could, which was not very fast however as he was very feeble, and then listened to his heart: it seemed to beat faster and the sound was very dull. could not be seen beating outside unless the finger was pressed upon it which it raised up feebly. This seemed to me to be caused by debility. it also beat very quick.

23<sup>rd</sup> Found him today in bed complaining of his throat at night. having had a very profuse one last night. he is weak to get up.

25<sup>th</sup>

Sitting up today.

Dr. D.

John Hamilton's case (a victim of Homoeopathy) John is about 12 or 13 years of age. Nervous. Billis Sanguineous temp, hard to say which. ~~the~~ day Active mind. About the first of April (1856) on a rather warm day, (according to his mother's account) he was splitting wood in the open air, and becoming heated took off his coat. Sometime the next day complained of pain in his right thigh. They tampered with him for about a week, with home made remedies, and still becoming worse, and sleeplessness coming on.

Exeter, August 1<sup>st</sup> 1854

along with delirium they sent for a Homoeopathic who fiddled and fooled with him about a month and came to the wise conclusion that was beyond the reach of Homoeopathy and requested his discharge. This case after passing through all the stages of inflammation, suppurated and an abscess of the thigh succeeded. Dr Bobbs and myself opened the abscess in two places and both are now discharging matter. The pus which was very thin and watery. Chloroform was given with the happiest result. Dr. Bobbs ordered rich ~~and~~ and nourishing diet, and poultices to the thigh.

May 9<sup>th</sup>

has changed his physician Dr. Womburg who has lowered his diet. I am afraid to his sorrow.

May 29<sup>th</sup>

Has been kept close to his room which is badly ventilated. incessant discharge from his thigh from both the upper and lower opening

He has been some time in a state of sheer exhaustion from the persistent discharge.

## Case of Mr. Tanner

August 18<sup>th</sup>

A young man, 20 yrs. of age. Fever, Bilious. When first seen had been suffering with diarrhoea for 10 days. When I saw him, found his pulse full and very compressible. Tongue furred, and of a dirty white colour. Bowels a large & natural nature.

Prescribed Cal.  $\frac{j}{2}$  every two hours. *Phosphoric acid*  $\frac{ss}$  *Infus. of Sassafras*  $\frac{ss}$   
*Infus. of Sassafras*  $\frac{ss}$   
*Infus. of Sassafras*  $\frac{ss}$

Aug. 19<sup>th</sup> Tongue still very much furred, and keeps his diarrhoea stop, in a great measure, though his stools are still thin, but their colour is now yellow. Two or three days ago I gave him Cal.  $\frac{ss}$  3 times. Since I have given him no medicine since. His appetite is very scant and he is I think all the better for it.

August 25<sup>th</sup>

Has been gradually improving since the ninth day of the Fever. Today his pulse was soft and regular about 40 per minute. Skin soft & natural. No operation of the bowels for two days. He has been taking for the last two or three days a teaspoonful of the following mixture every three hours. Up to day he now takes it every 4 hours.

R. Infus. Sassafras	℥i	The Sassafras was added
Infus. Cinchona	℥i	to check a diarrhoea which
Infus. Sassafras	℥i	he had.
Infus. Sassafras	℥i	

August 26<sup>th</sup> 1844 Sitting up, eating his breakfast. Pulse soft and rather quicker than yesterday at the same time. Tongue cleaning off. Skin moist and natural temperature.

August 27<sup>th</sup> Has up & getting up walking his room. Tongue cleaning rapidly, not by clean. Pulse at 9 o'clock 40. Bowels opened once daily. Skin natural. Expression natural.

April 28

171

Age. Much emaciated says he has only been confined to the House 3 Months. Very flat on both sides of chest. Night sweats, oedema of lower extremities. Phthisis eye ~~rotted~~ can scarcely walk. but manages to walk easily and slowly about the ward. ordered a Galespoonfull of Cod Liver oil in North 3 times a day.

25<sup>th</sup>

Found with his clothes on but very weak. detected either ~~and~~ enlarged Bronchii filled with mucous or a cavity at the summit of the right lung. Feet very oedematous, ~~rotted~~ no change

---

Continuation of W<sup>m</sup> H. Canach's case.

July 1<sup>st</sup> 3 operations. Health good except to thin and pale.

July 9<sup>th</sup> 1 operation. Dr Dr Dr Dr Dr 40

" 10<sup>th</sup> 4 operations Dr Dr Dr Dr Dr 50

July 20<sup>th</sup> Had a high fever was very restless. Head and superior part of his body hot and acrid. while the feet cold vomited up his milk several times done well up to this time. Allayed the vomiting by a little peppermint and Paregoric. Bathed his legs in a hot Mustard water which appeared to relieve his head and break the fever. Repeated it before bed time and he slept the second night naturally and awoke well.

June 1<sup>st</sup> 1857 Vaccination.

W<sup>m</sup> Langdon age 5 months, in good health. Serum Temp: ~~Normal~~ <sup>anemic</sup> was vaccinated at 10 A.M.

June 2<sup>nd</sup> The punctures a little redder. No areola perceptible. No fever. No perceptible deviation from health.

June 4<sup>th</sup> The former vaccine did not take and had to revaccinate him.

June 5<sup>th</sup> No perceptible change

June 6<sup>th</sup> Little. These failures I attribute to my not drawing enough blood, having only produced a slight redness.

June 1<sup>st</sup> day 8<sup>th</sup> Revaccinated for the third time. Took a little more blood.

June 2<sup>nd</sup> day 9<sup>th</sup> Faint blushing areola.

June 3<sup>rd</sup> day 10<sup>th</sup> Areola extending. Vesicular elevation perceptible. Ring of small vesicles surrounded by a faint and narrow areola. No constitutional disturbance.

June 4<sup>th</sup> day 11<sup>th</sup> Vesicles have united and become one large one. More elevated. Areola not much altered either as to size or colour.

June 5<sup>th</sup> day 12<sup>th</sup> Vesicle <sup>larger</sup> and more elevated. Areola not much different. No Constitutional symp.

June 6<sup>th</sup> day 13<sup>th</sup> Vesicle becoming more <sup>silvery</sup> and elevated. Areola about the same. No Constitutional symptoms.

June 7<sup>th</sup> day 14<sup>th</sup> Vesicle more developed having a small particle of encrusted lymph in the Centre. Commencing to pit. Areola 6 times longer and redder. ~~No Constitutional symptoms.~~

June 8<sup>th</sup> day 15<sup>th</sup> very pretful the afternoon of the day. No change except the vesicle more elevated and ~~more~~ <sup>duller</sup> white not so silvery. The pit more marked.

June 9<sup>th</sup> day 16<sup>th</sup> Areola now wider, commencing to fade, vesicle changing gradually

very petulant, may be on account of the heat

from the centre into garnet coloured scale. ~~Constitutional symp.~~

June 16<sup>th</sup> Day 10<sup>th</sup> Aseola still fading. The garnet coloured scale has encroached so upon the vesicle as to leave a vesicular ring around it, has also become more deeply coloured and dryer

June 17<sup>th</sup> Day 11<sup>th</sup> Aseola almost disappeared. Scale taking the place of the vesicle. Assuming daily a more decided garnet colour.

June 18<sup>th</sup> Day 12<sup>th</sup> Aseola entirely gone, also the vesicle, nothing now remains but the scale, which has not yet began to loosen.

June 19<sup>th</sup> Day 13<sup>th</sup> Aseola and Constitutional symptoms all gone. I mean Restlessness which makes him fret and cry through the day. Scale still tight but show a disposition to separate from the surrounding tissue in which it is imbedded.

June 20<sup>th</sup> Day 14<sup>th</sup> Scale still tight and drying fast.

June 21<sup>st</sup> Day 15<sup>th</sup> Scale still tight. Appears perfectly dry, except a little oozing from the centre.

June 22<sup>nd</sup> Day 16<sup>th</sup> Scale still tight loosening around one edge. A little oozing from the centre.

June 23<sup>rd</sup> Day 17<sup>th</sup> Scale drying, and shrinking.

June 24<sup>th</sup> Day 18<sup>th</sup> Scale much smaller.

June 25<sup>th</sup> Day 19<sup>th</sup> Scale still shrinking, and tight

June 26<sup>th</sup> Day 20<sup>th</sup> Scale still tight and smaller.

June 27<sup>th</sup> Day 21<sup>st</sup> Scale still tight, begins to raise up. No compact.

June 28<sup>th</sup> Day 22<sup>nd</sup> Scale loose.

June 29<sup>th</sup> Day 23<sup>rd</sup> Scale lost, was lost some time in the night. Not yet visible in the scar as yet.

N.B. On the 13<sup>th</sup> Day the Local and Constitutional symptoms were at their Acme.

# Diarrhea

Aug 21<sup>st</sup> 1858. I was attacked with ordinary diarrhea and made myself some pills containing Acet: phos: grs which I took every two hours. Not regularly ~~however~~ <sup>however</sup>. No good ensuing I changed them for the following

Mixture Tinct: Catechu ℥i  
Cocta Preparat: ℥ss  
Tinct: Opii Camp: ℥i  
Tinct: Cinnamon ℥i  
℞: Seasoned every hour

Aug 23<sup>rd</sup>

Worse. Stools like serum and mucous. For 4 a day. Dieting strictly. Water and Tea & Rice  
Aug 24<sup>th</sup> Finding these remedies useless, I abandoned them, and thought I would try Tinct: Nuc: Jenu. not having a very good reason for so doing, as my mind was very imbecile at the time

Aug 27<sup>th</sup> In addition to the above. I grs VIII of D. P. twice before retiring. After taking the Hon a bout a ℥i all together in 3 doses. (more or less) I took upon retiring. grs VIII or X of D. P. I did not weigh it. Almost immediately upon taking the D. P. I felt sick and had difficulty retaining it. As soon as I laid down up it came with the, I think, Hon from the acid taste.

Aug 28<sup>th</sup>

I concluded I was not treating myself right and that Cal: & Rhei was indicated I accordingly took the following. Cal grs iii.  
Almost immediate relief Rhei grs vi  
an' change in the colour of stools. D. P. grs vi  
℞: ℞: Jul: No XII. S. one every hour

Jan 29<sup>th</sup> Much better. took now Cal: grs VI. 175  
~~Rhei gr VI~~  
D. P. grs VI  
No 17: pil XII one  
every hour.

Jan 30<sup>th</sup> Convalescent. took now Quinine grs VI.  
D. P. grs VI.  
No 17: pil: No XII  
One every hour

Jan 31<sup>st</sup> Well. No operation. Since day before  
yesterday 2 days and a half. No one  
this evening. making 2 days and a half.  
I thought I should not taking any aperient  
but let Nature do her work. I was right  
May I always do so.  
"Natura sanat"  
"Medicina curat" I hope  
will be my motto.

P.S. Stungents were the stumbling blocks  
of Nature in this case. Cal: Rhei Quinine  
and the small doses of D. P. the adjuvants.  
I consider it very important to notice, that there  
was no symptom on the tongue, eyes, skin, or pulse  
indicating Hepatic torpidity.

Return of Diarrhea after almost a year  
Monday Dec<sup>r</sup> 13<sup>th</sup> Was attacked similar to the attack of last Jan<sup>y</sup>. Riping  
pains at night, with operations sometimes almost natural as to  
colour & consistency but small as to size, and <sup>at</sup> other colour good but  
consistency too mushy. Was troubled most a night, 2 operations  
at night. Dec 15<sup>th</sup> I attributed it to crabs but may  
be mistaken. Painful Borborymi, with smarting of the sphincter

Have taken no medicine or altered my diet. Sometimes a  
 month or thereabouts was attacked suddenly with sick  
 head, during which I vomited bile all night. No symptoms  
 of hepatic torpidity as before. I suppose I have 5 or 6 motions  
 in the 24 hrs. Dec<sup>r</sup> 17<sup>th</sup> Diarrhea not getting any better, I took <sup>Colic</sup> <sup>in grip</sup> <sup>no pill</sup>  
 one every two hours. <sup>beginning</sup> after 2 hours after meals. No change in diet. Dec<sup>r</sup> 18<sup>th</sup> Operations  
 much thinner & more bilious attribute it to the medicine, took 7 pills  
 = 3 grs of each. Griping about the same. No difference <sup>experience</sup> except  
 as to colour & consistency of stools. Intend taking <sup>Leimure gri</sup> <sup>Pulv D. P. 72</sup>  
 4 or 5 operations in 24 hrs. Attending to my <sup>Colic</sup> <sup>in grip</sup> <sup>no pill</sup>  
 alteration in diet. Dec<sup>r</sup> 20<sup>th</sup> Took 3 pills of the last sett, but had to  
 stop because of the griping, and frequency of operations being no less  
 than before; did not take any medicine yesterday and to day am  
 much better. I think the first pills unloosed my bound up  
 liver. If I had taken astringents as I did last year at  
 this time, I think I should have had the same difficulty.  
 C'est tres necepsaire, pour le Medecin, d'etudier  
 beaucoup, beaucoup, la Nature, en guerissant  
 les malades. Il lui faut, l'etudier avec l'  
 oeil medical, et ne se permet <sup>point</sup> pas de detourner  
 en routes charlatanneries. ~~Observation~~ Observation et  
 la Patience pourront ~~vous~~ nous guider ~~par~~ dedans  
~~les~~ ~~les~~ retraites de son ~~Labyrinthe~~ ~~Labyrinthe~~ Labyrinthe.
